# M.B.B. HOME

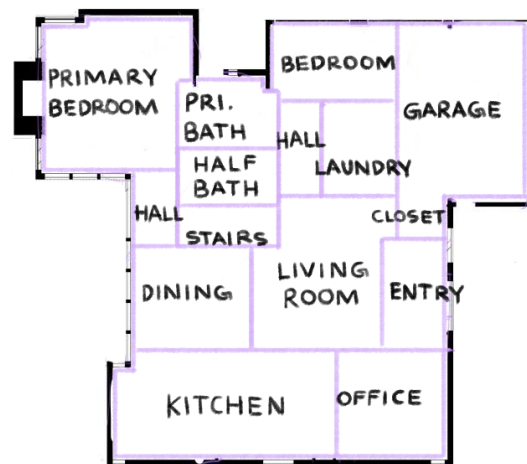

*bountiful remodel*

MAIN FLOOR  
OPTION 1

MAIN FLOOR  
OPTION 2

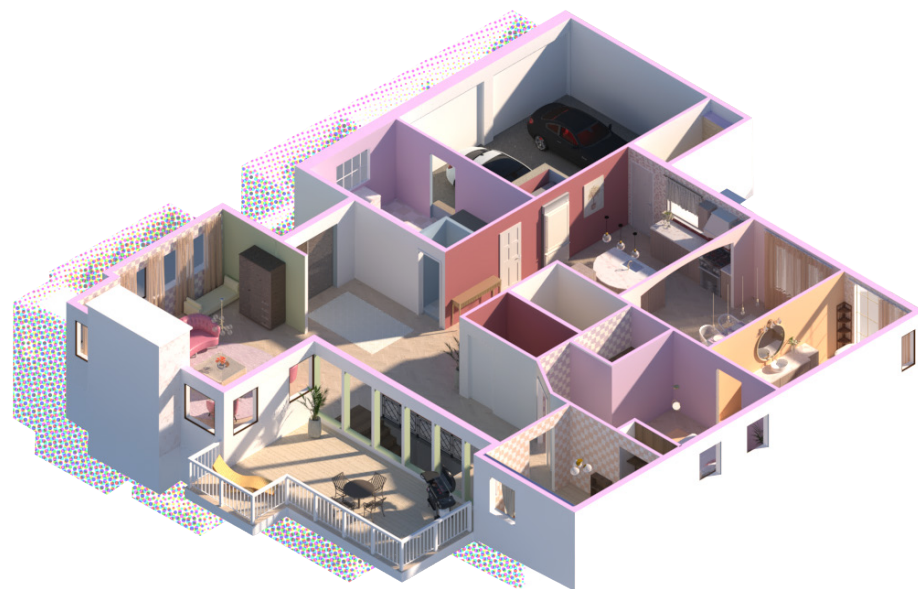

BASEMENT  
OPTION 1

BASEMENT  
OPTION 2

Youthful. Self expression. Individuality. Empowerment. Millie Bobby Brown was the intended inspiration for this home remodel. Taking into account her lifestyle and aesthetic, vibrant and statement finishes were included from the start, and never settling for simple just because it's convenient. Concept layouts and collages helped bring it all together by considering every possible layout to achieve expression of being yourself.

OPTION 1: BERRY

OPTION 2: IRIDESCENT

OPTION 2: SUMMER

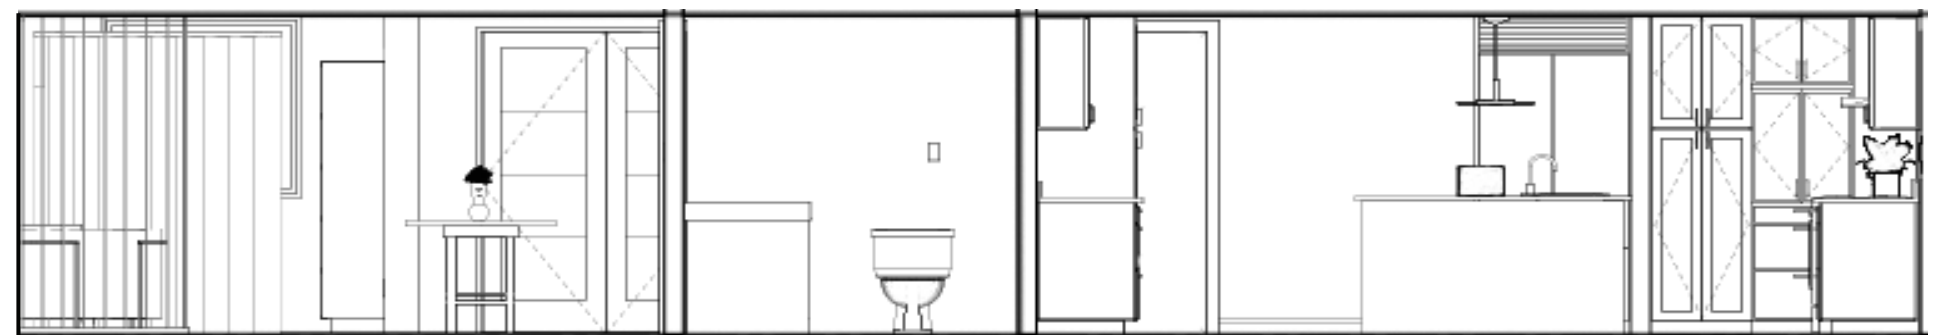

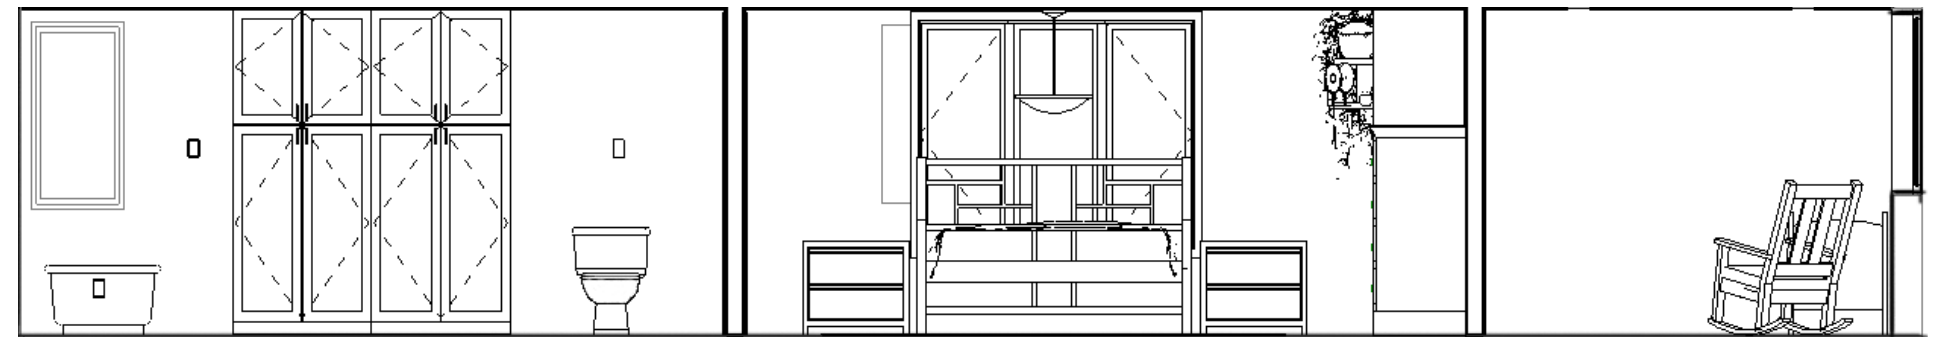

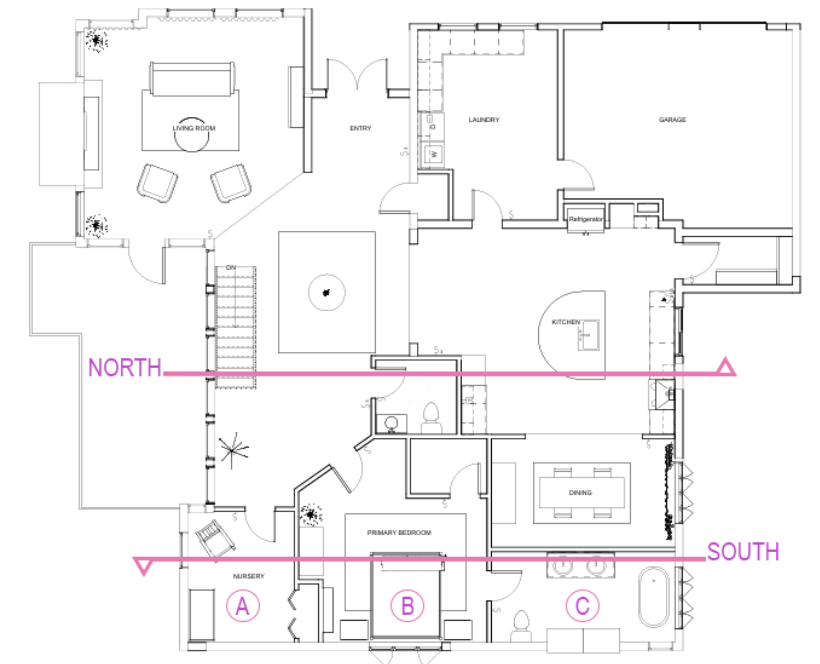

The main floor is separated in a way to communicate different aspects of a human being. Everyone has multiple qualities that make up their personality, but connect in a way that makes them unique and individual. Lighter materials and finishes help elevate the feeling of youthfulness and comfort. A home can be a reflection of one's identity and beliefs.

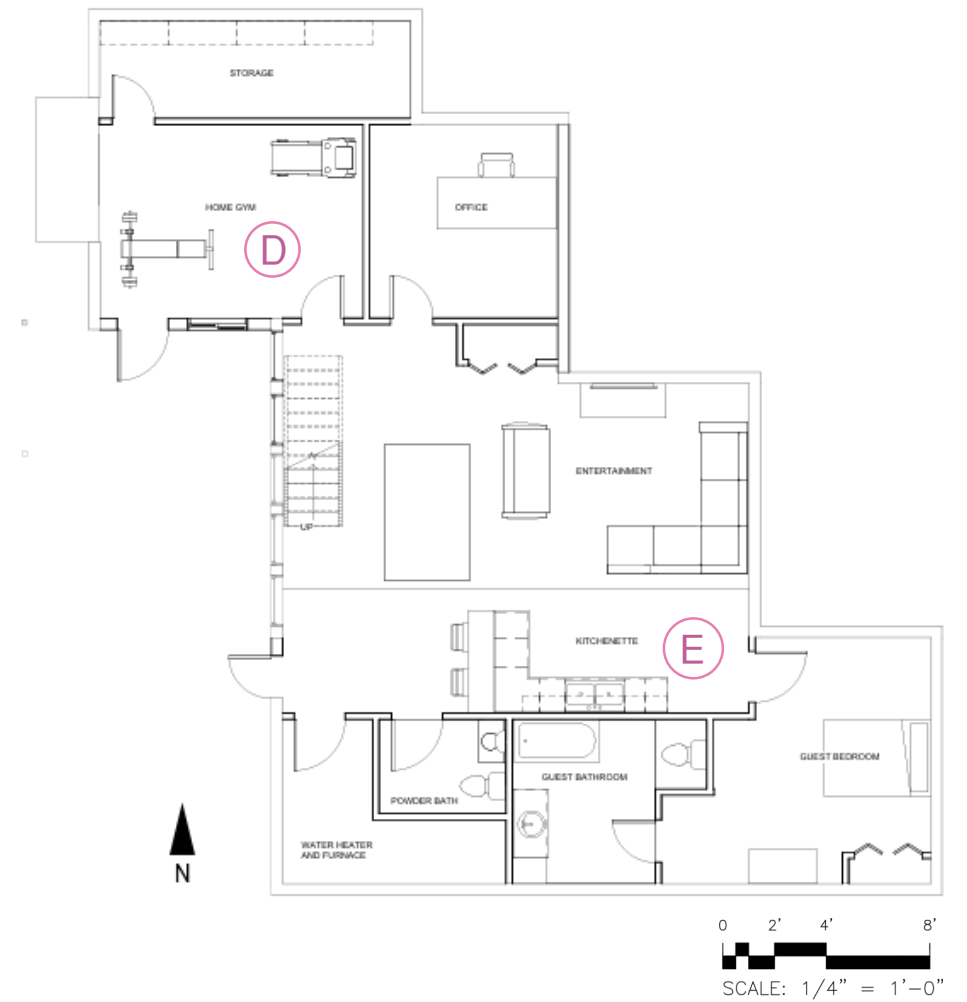

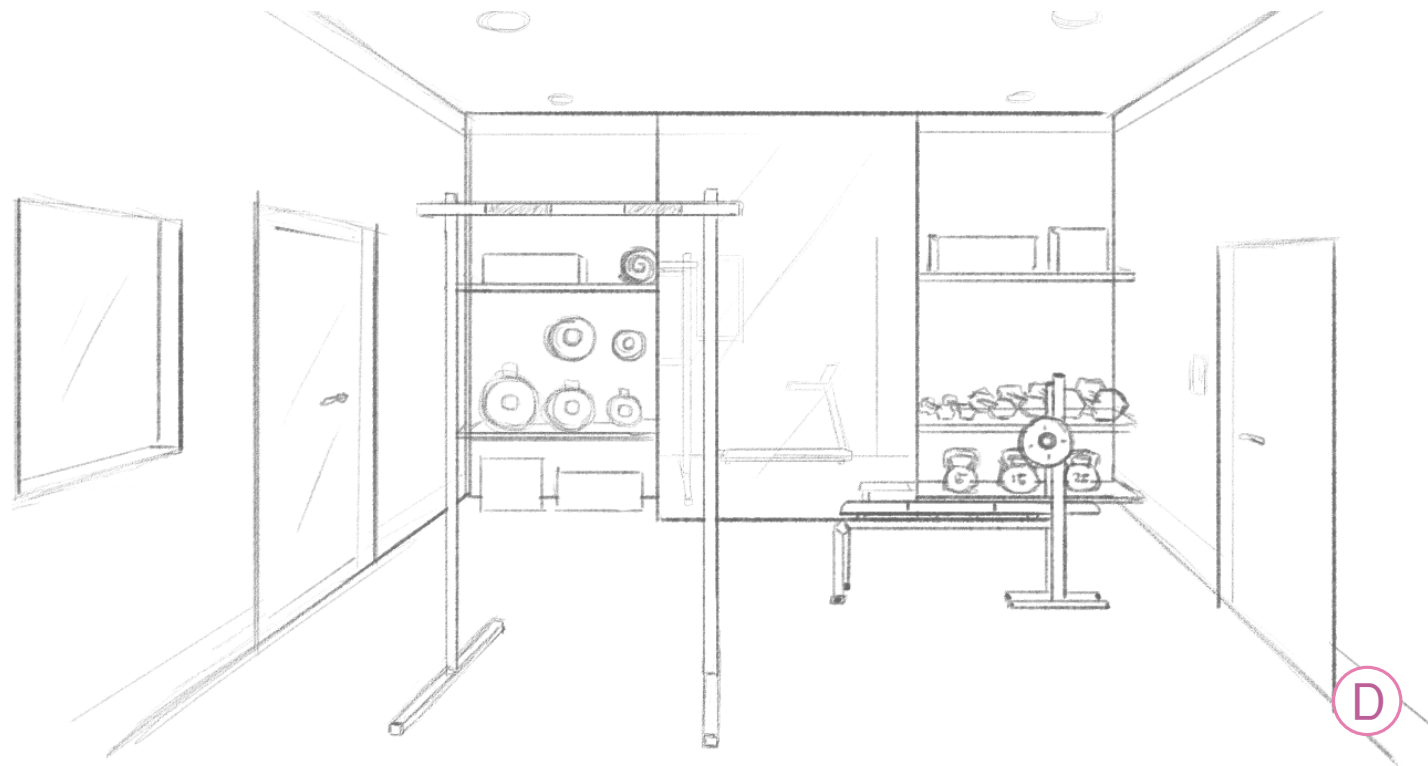

*"In many ways the bedroom is the most important space in the house. Creating an environment that encourages sleep is vital and, as the junction of functional and beautiful design, the bedroom has been the focus of experimentation by some of the greatest architects and designers." (Salvatori Official)*

There is a certain assurance of privacy and peace when you are in your bedroom or getting ready in the bathroom. While each space has its own function, both are necessary for feeling ready to take on the day.

The basement is just as important as any other floor. True self improvement and empowerment starts with the environment we create at home; by transforming this space, you create a foundation to build your physical, emotional, intellectual, and social skills.

# LUCERNA

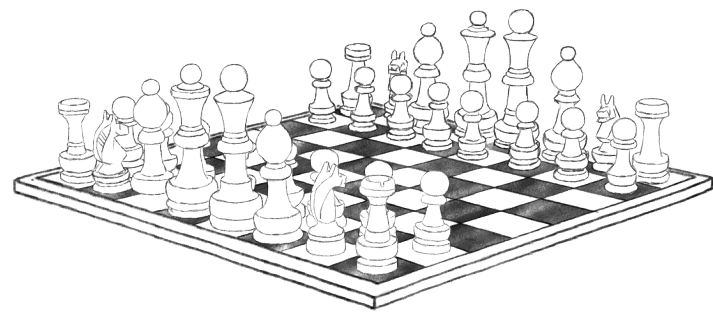

*boutique hotel*

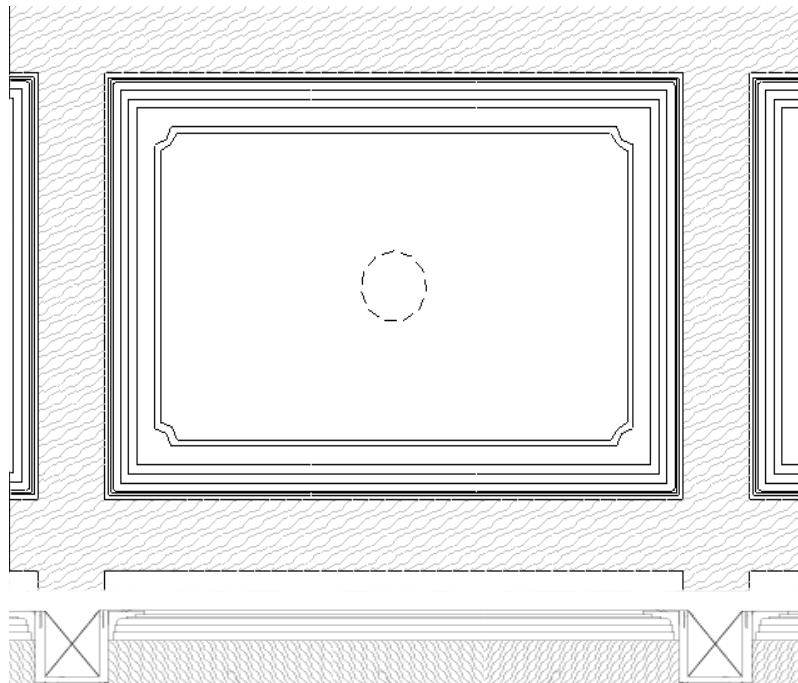

*Lucerna* means light, or in this case, *enlightenment*. The idea behind the hotel is the value of knowledge and learning, where luxury meets the pursuit of understanding. True enlightenment requires looking back to see forward. The history we inherit, and the cultures we cross do not just exist in textbooks; they shape our lives, our daily rituals, and our future.

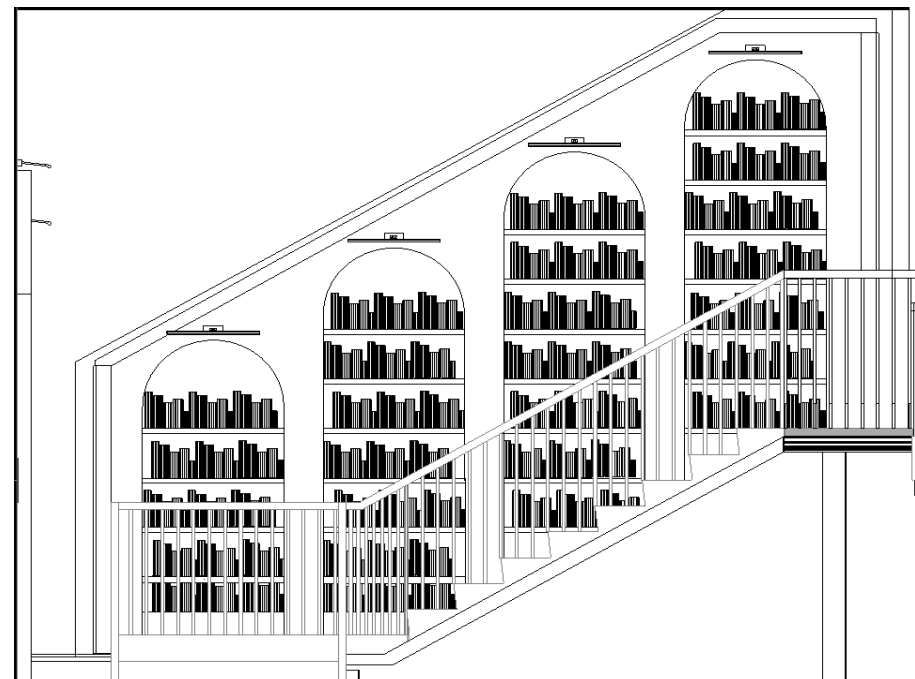

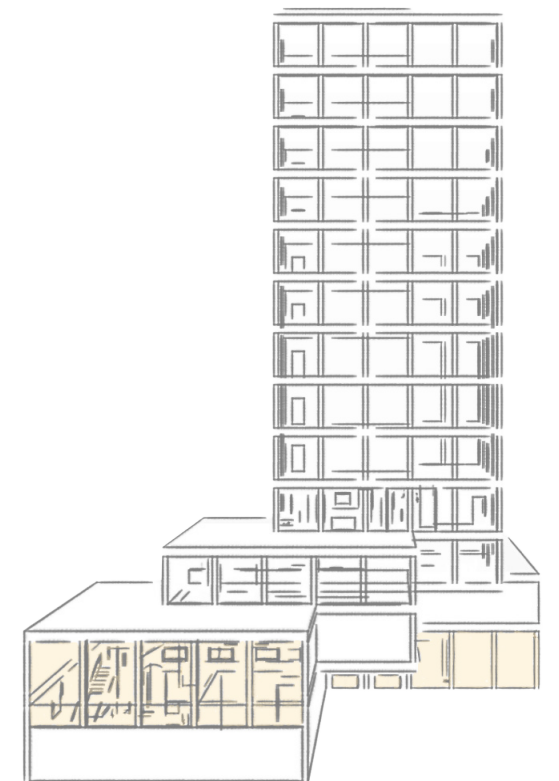

The first floor takes shape with the lobby and the restaurant. An introduction into social and intellectual community. Areas where guests are free to converse and reflect. From floor to ceiling, each finish was designed in mind to promote a warm, welcoming feeling that makes guests want to sit down and have a good conversation.

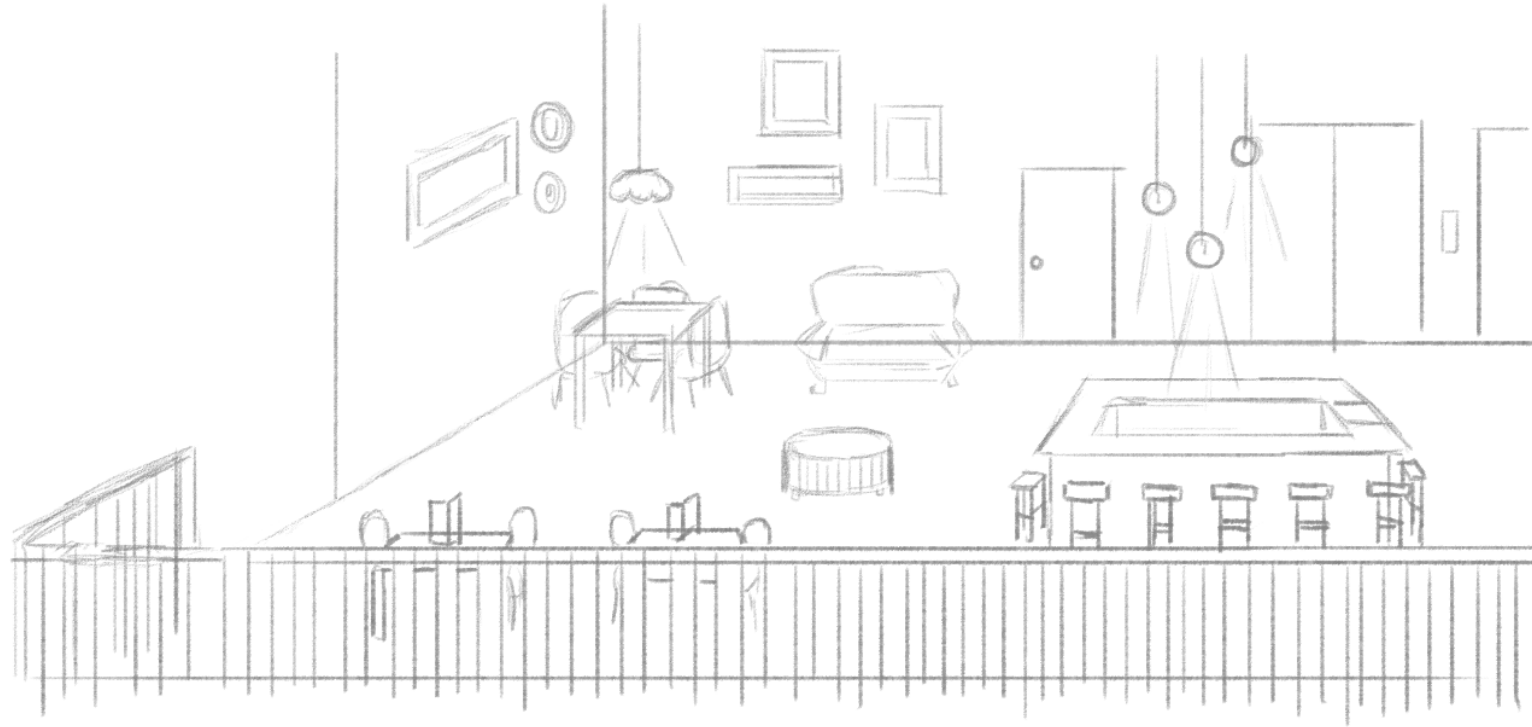

COFFERED CEILING

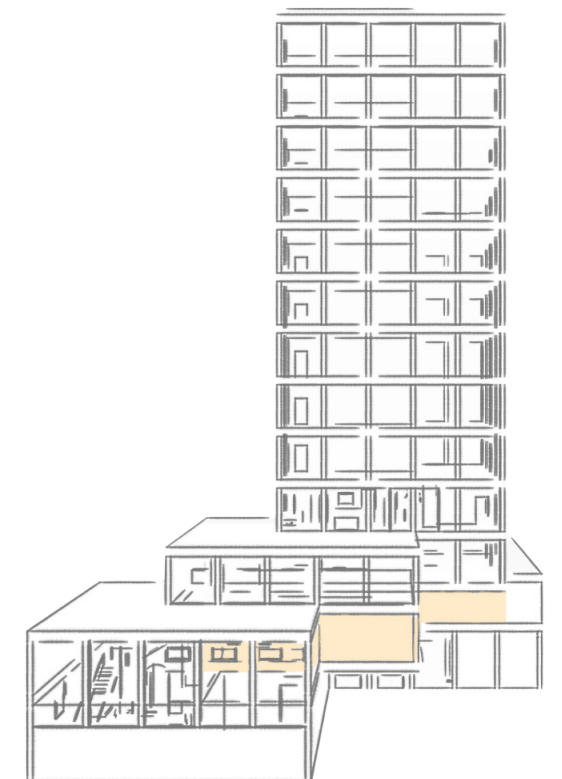

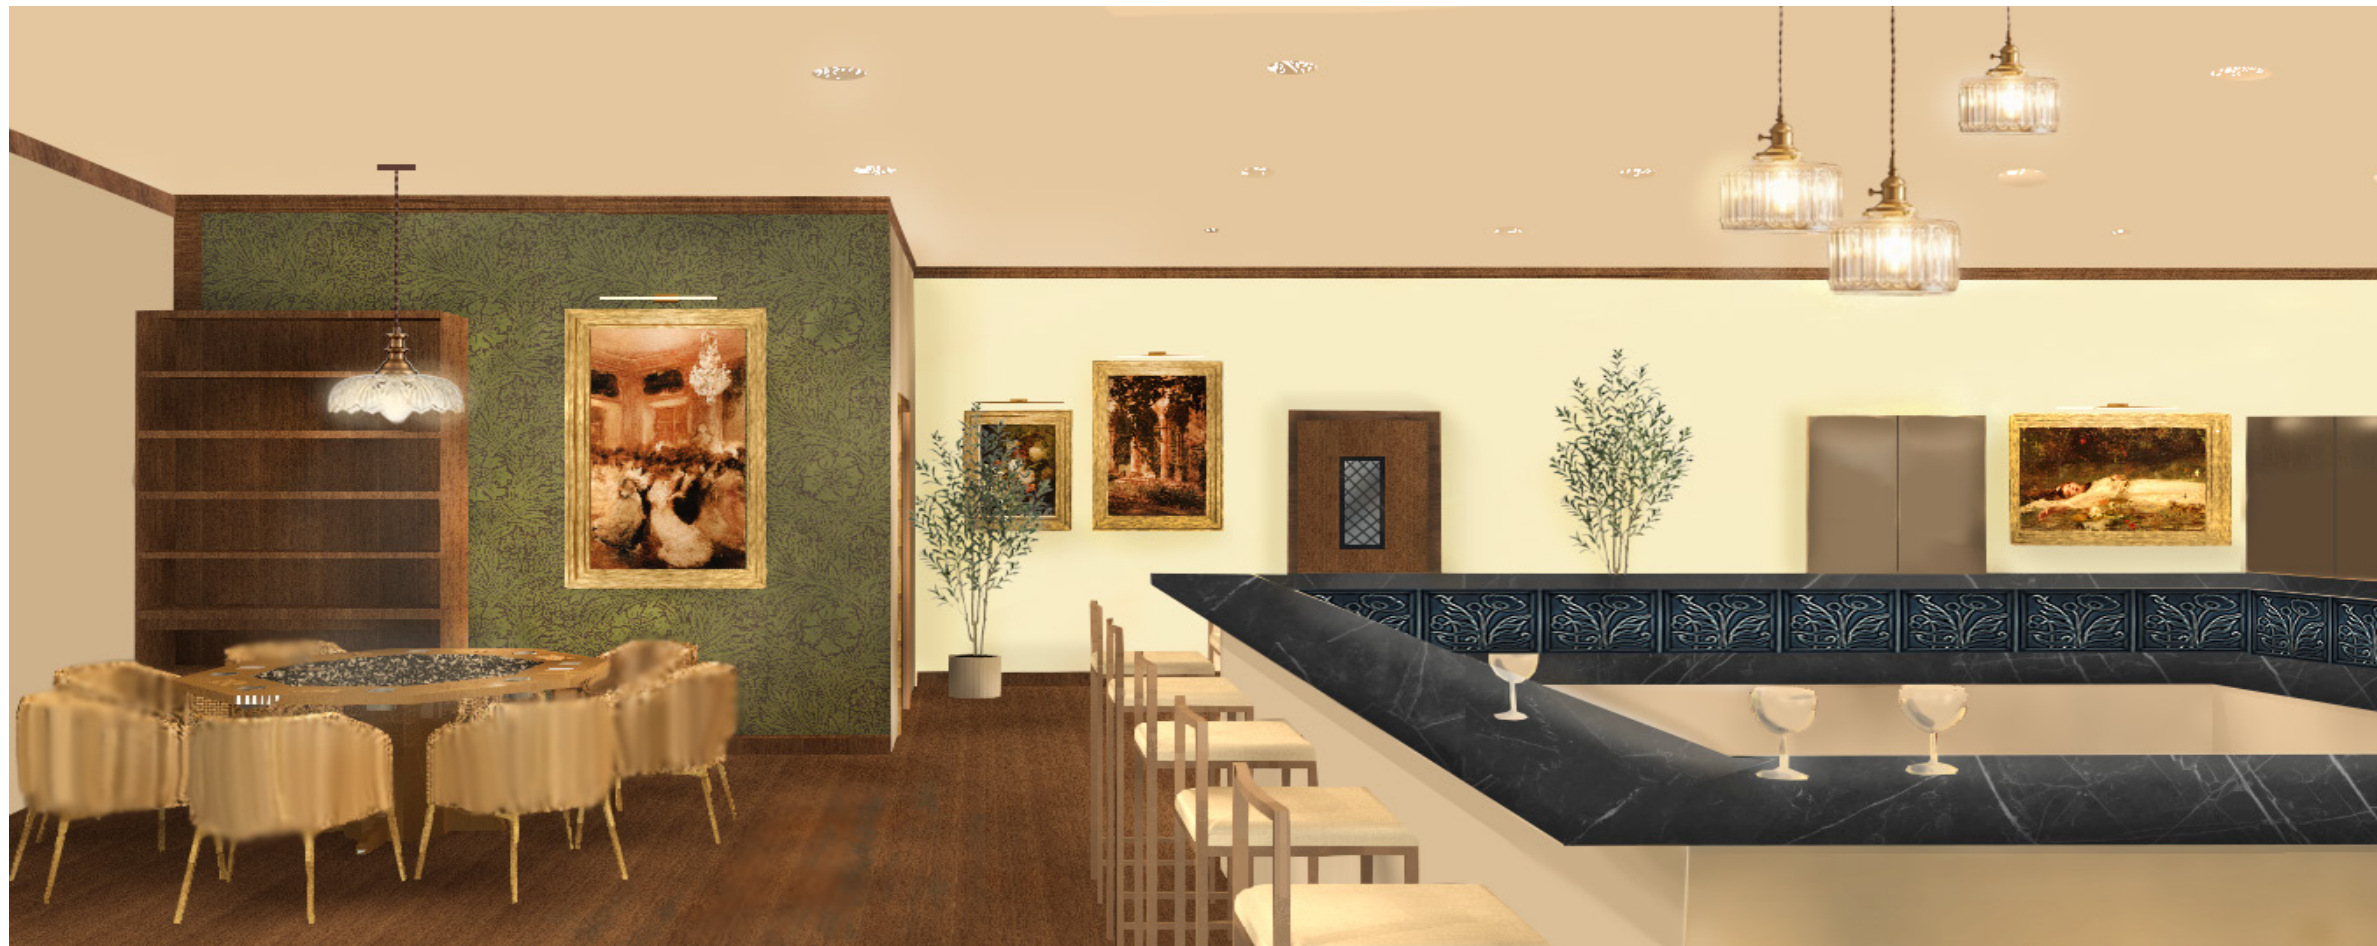

CUSTOM BOOKCASE

The second floor brings energy and life as guests are drawn together. Furniture shapes are arranged to promote movement and involvement. Lowered ceilings for a more personal connection. Sharing culture is made possible when barriers are removed, and people can simply enjoy one another's company.

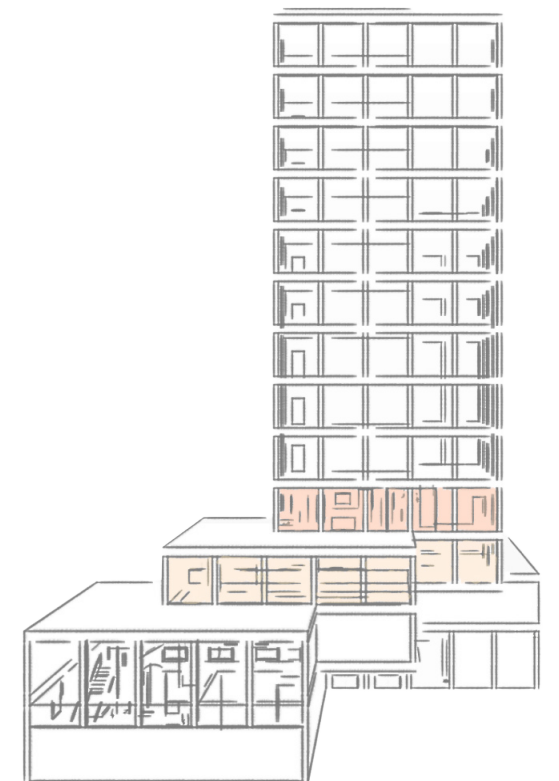

The fourth floor and beyond offer a place to unwind and rest. Each guest suite floor features three suites, two of which are accessible. Privacy and comfort are standards, not the bare minimum. All furnishings and finishes meet life-safety and building codes, prioritizing function over form while remaining deeply rooted in style, beauty, and sophisticated design.

Below the former is the third floor where knowledge is held in high regard. Guests are free to learn about the world through the interactive map in the library. Administration and business meetings also take place on this floor to serve as a base for intellect and critical thinking.

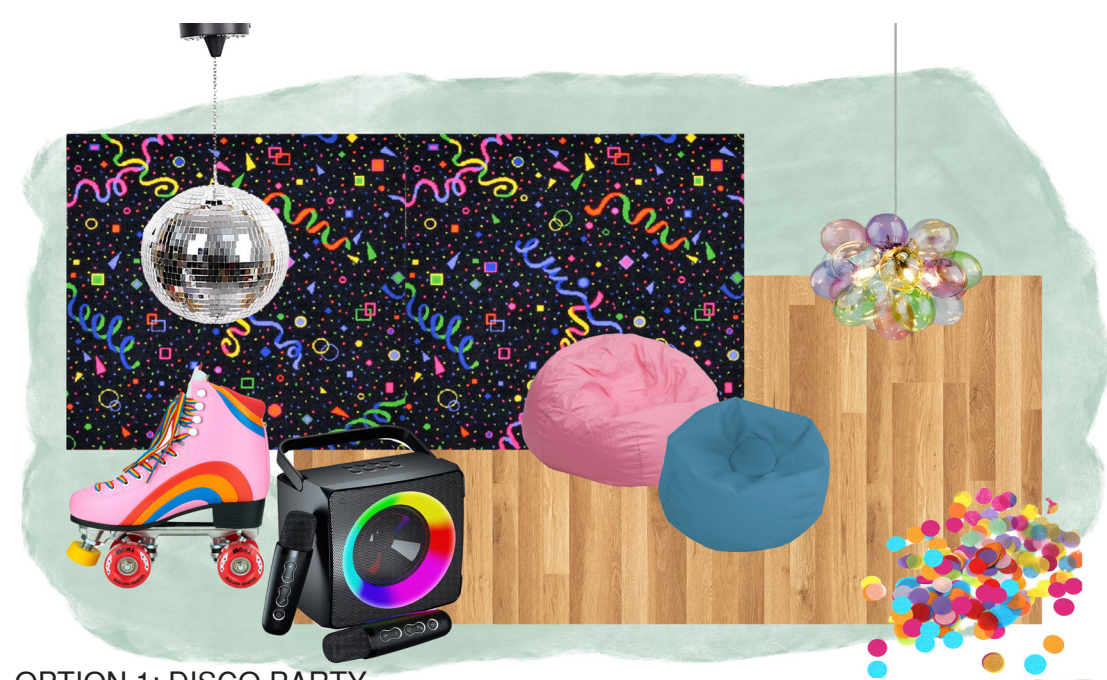

# KINGDOM QUEST

*cruise ship*

*"Imagination is a cornerstone of childhood development, laying the groundwork for lifelong learning and personal growth." KidsFirstServices*

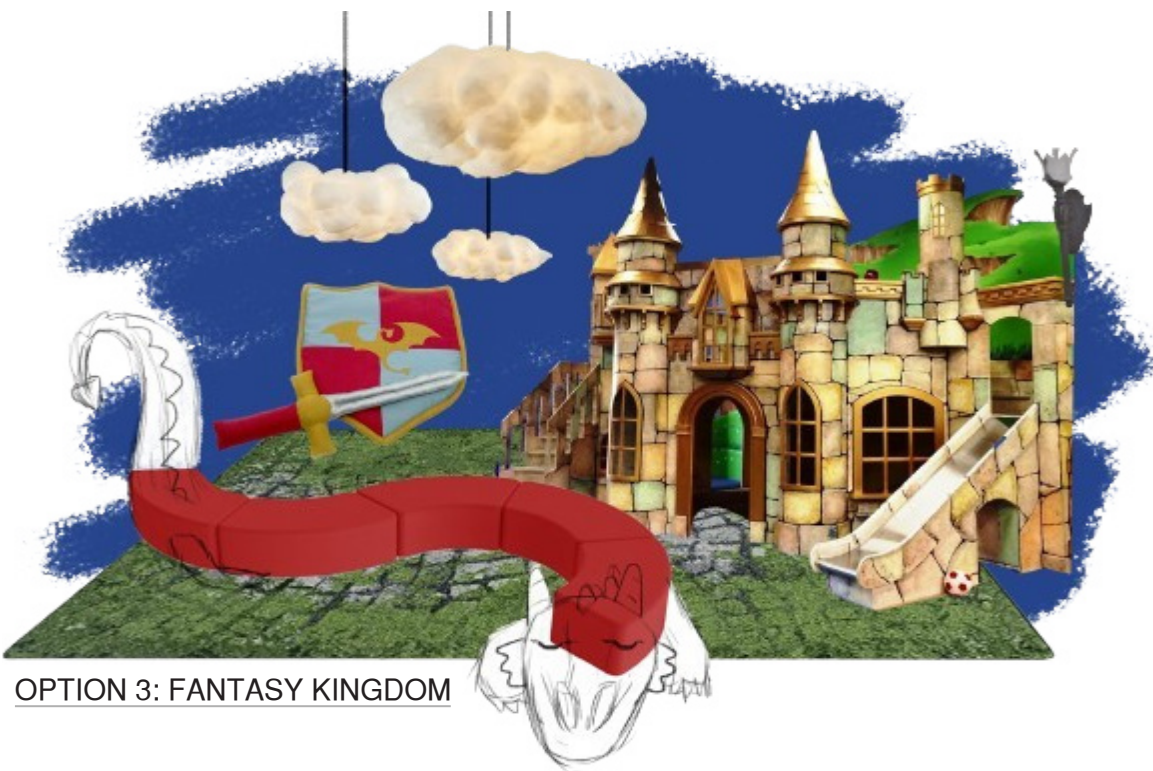

OPTION 1: DISCO PARTY

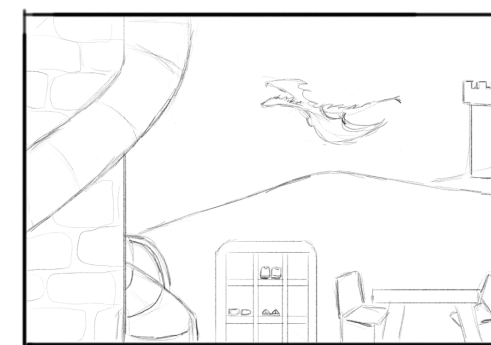

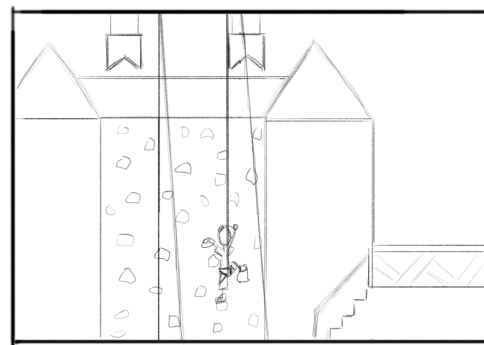

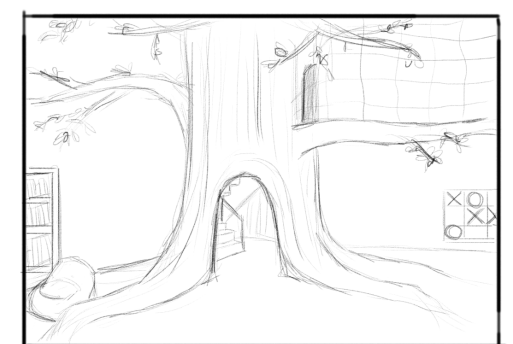

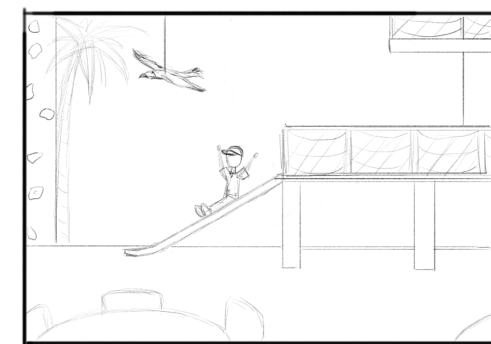

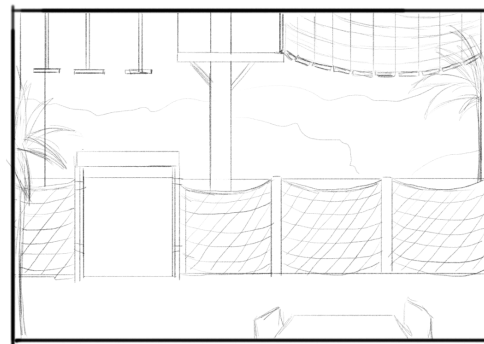

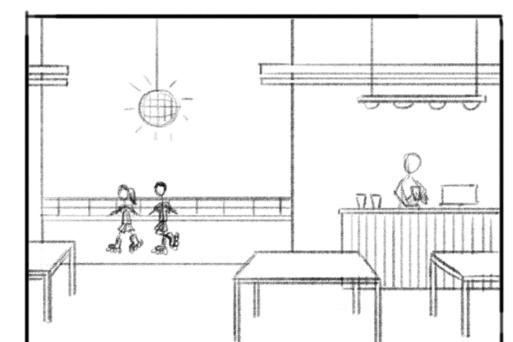

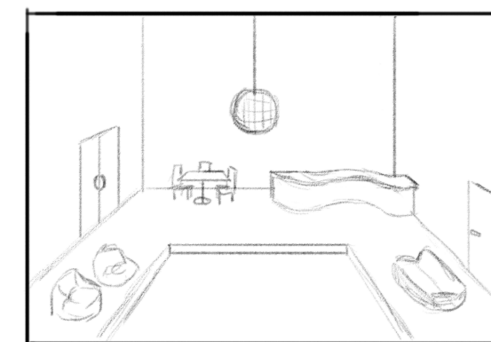

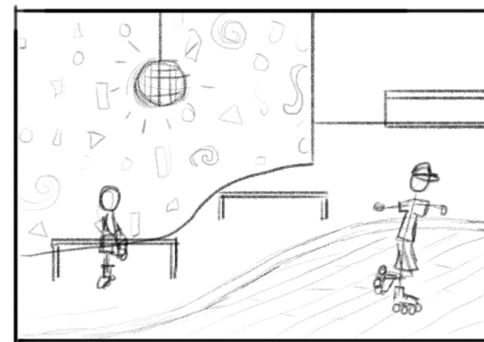

OPTION 2: JUNGLE EXCURSION

OPTION 3: FANTASY KINGDOM

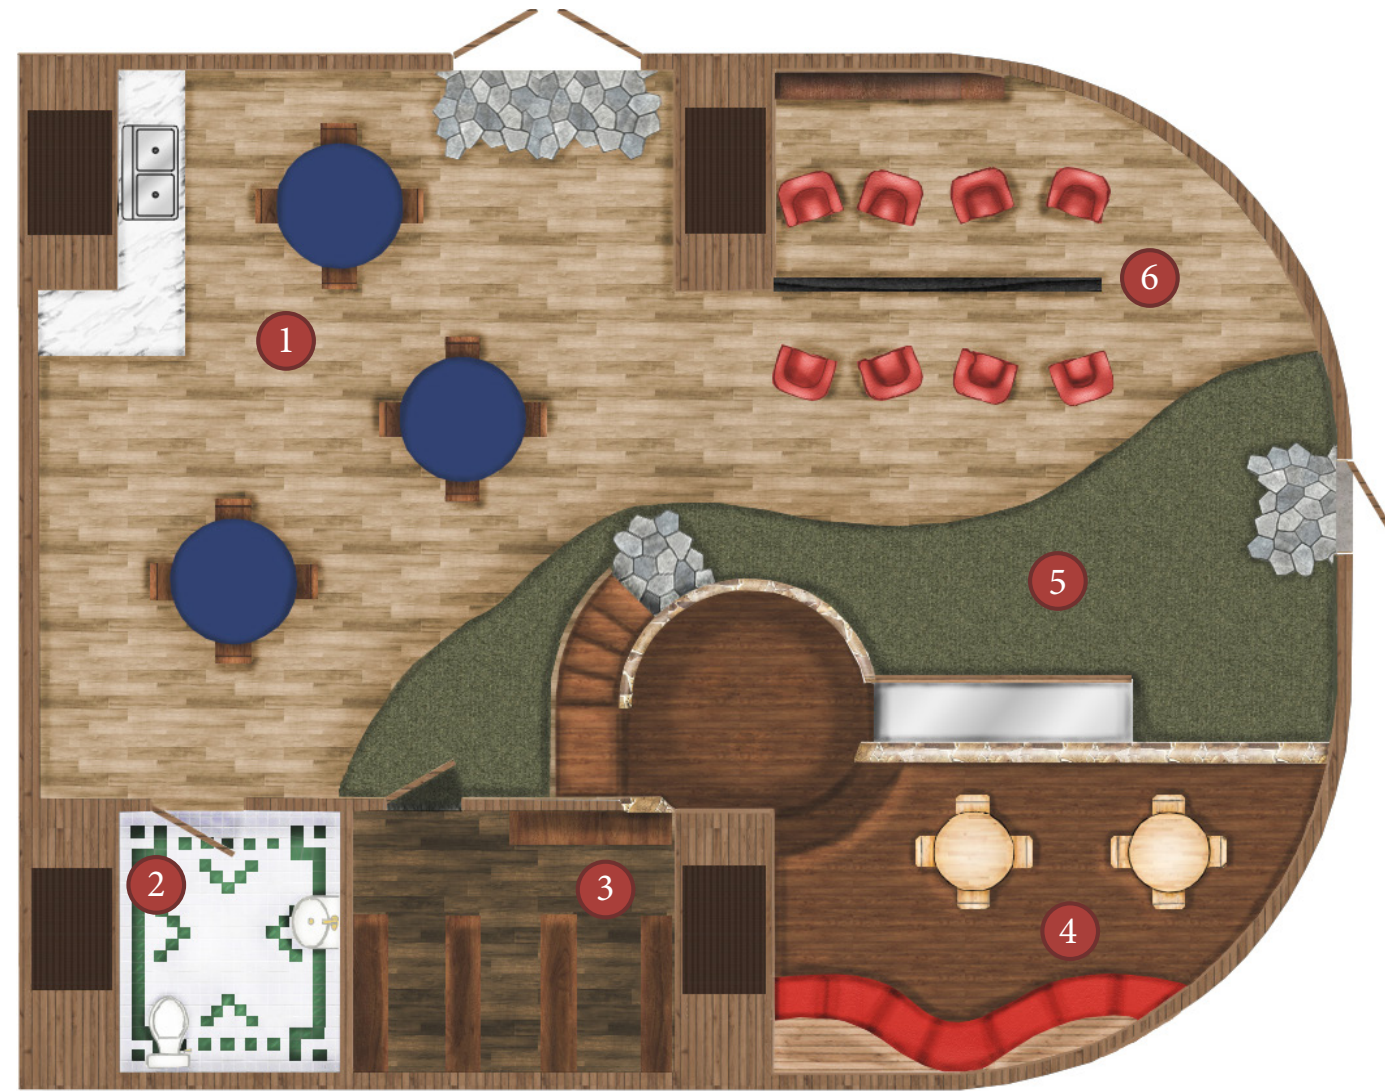

*“Color is more than just a visual experience; it is a powerful psychological tool that can influence mood, behavior, and even cognitive function.”*  
(BlueWoodKids.com)

Each ideation was required to have vibrant colors for this purpose. Another intention was to create a space that children aren't normally surrounded by: deep jungles, sparkling disco parties, or even a fairytale castle. Nothing is impossible with a little imagination.

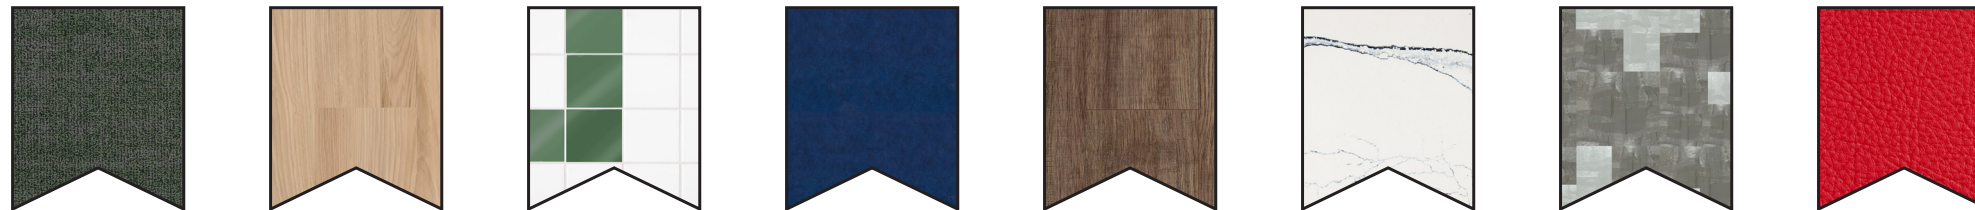

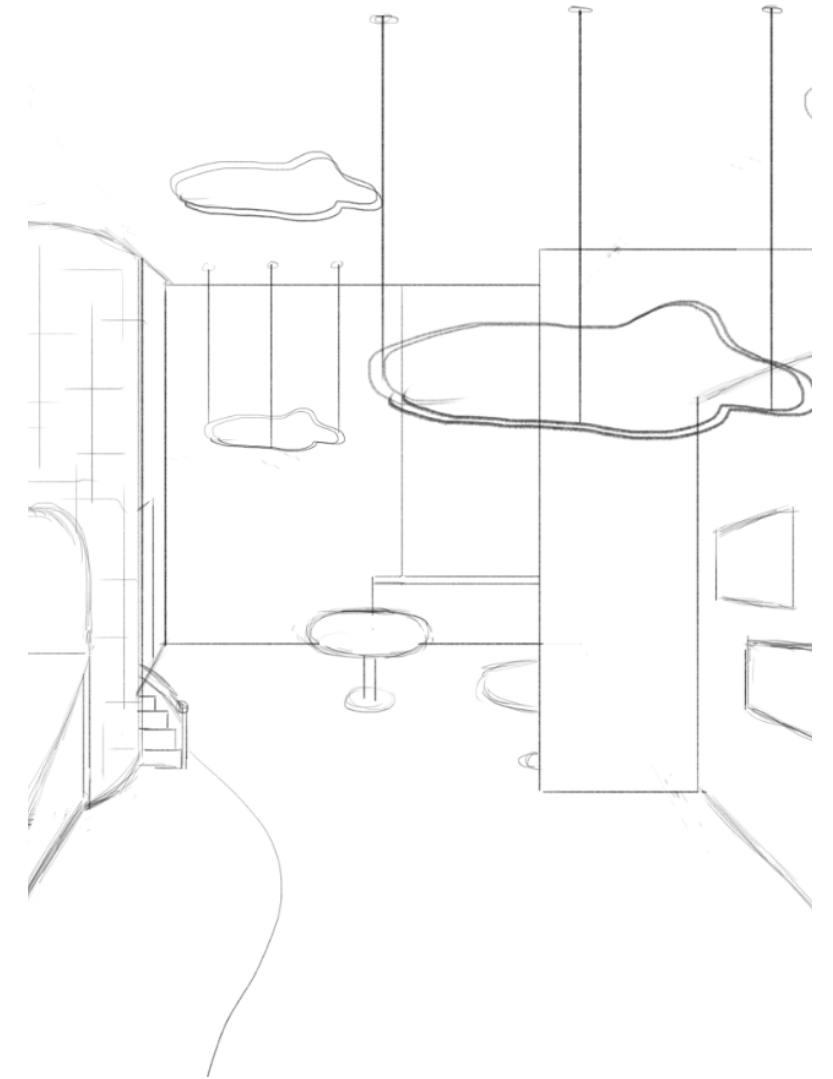

- 1 SNACK COUNTER
- 2 ACCESSIBLE BATHROOM
- 3 STORAGE
- 4 CASTLE MEZZANINE
- 5 ACTIVE PLAY
- 6 GAMING CENTER

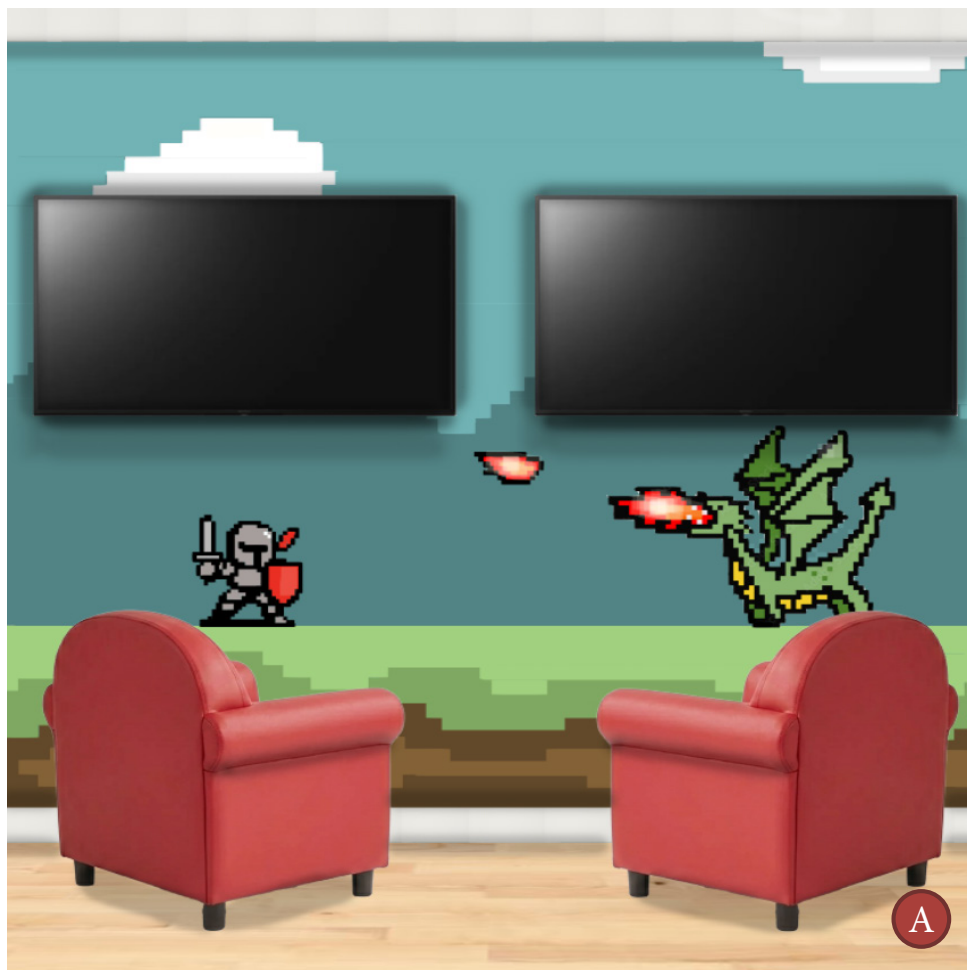

FLOOR PLAN

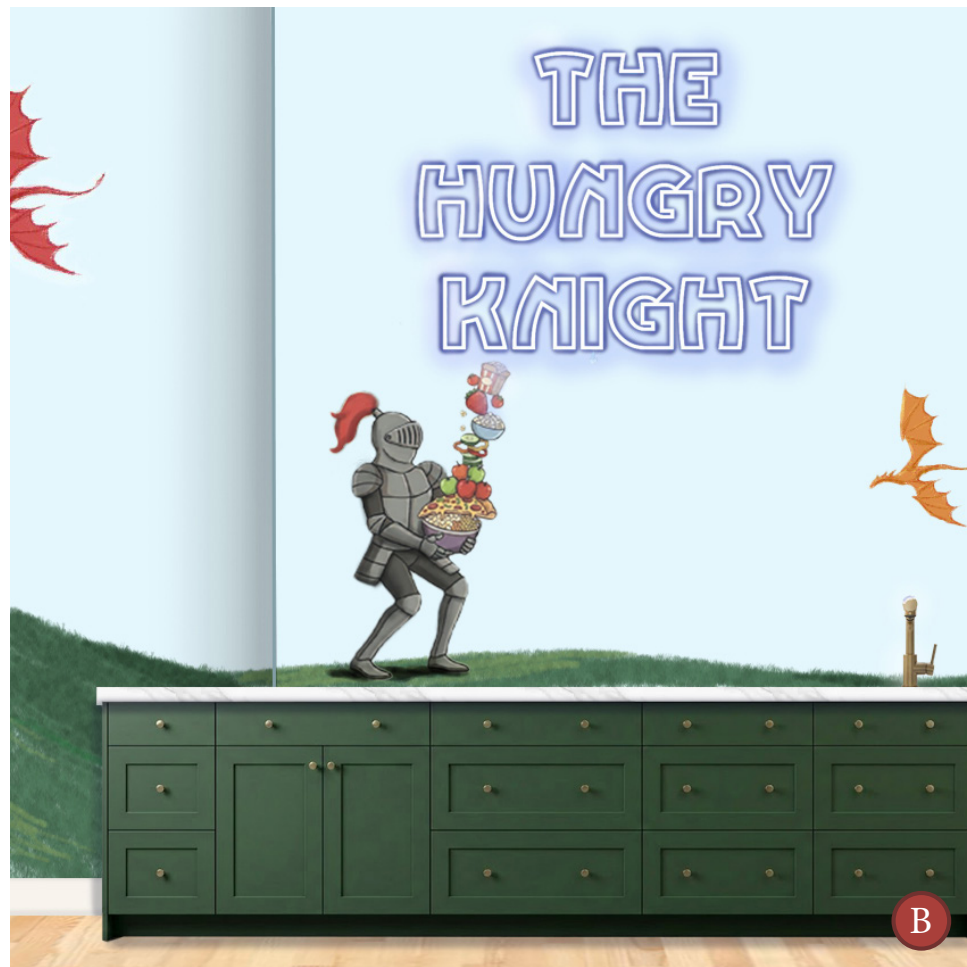

Early childhood play is categorized into different developmental areas: cognitive/constructive (building), dramatic/socio-dramatic (role-playing), sensory (exploring textures), active/physical (running, climbing), and self-regulation/communication (games with rules). As children interact and explore, this cruise ship wing is not only a fun experience but also helps support both mental and physical development necessary in childhood.

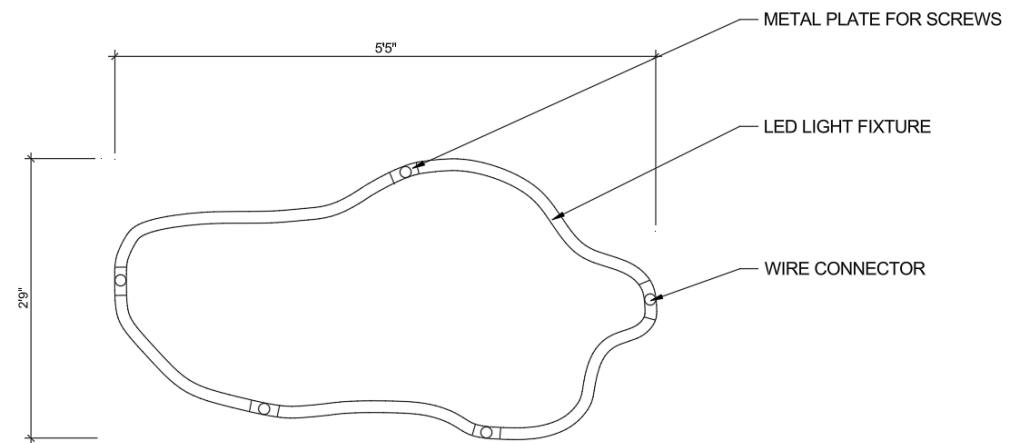

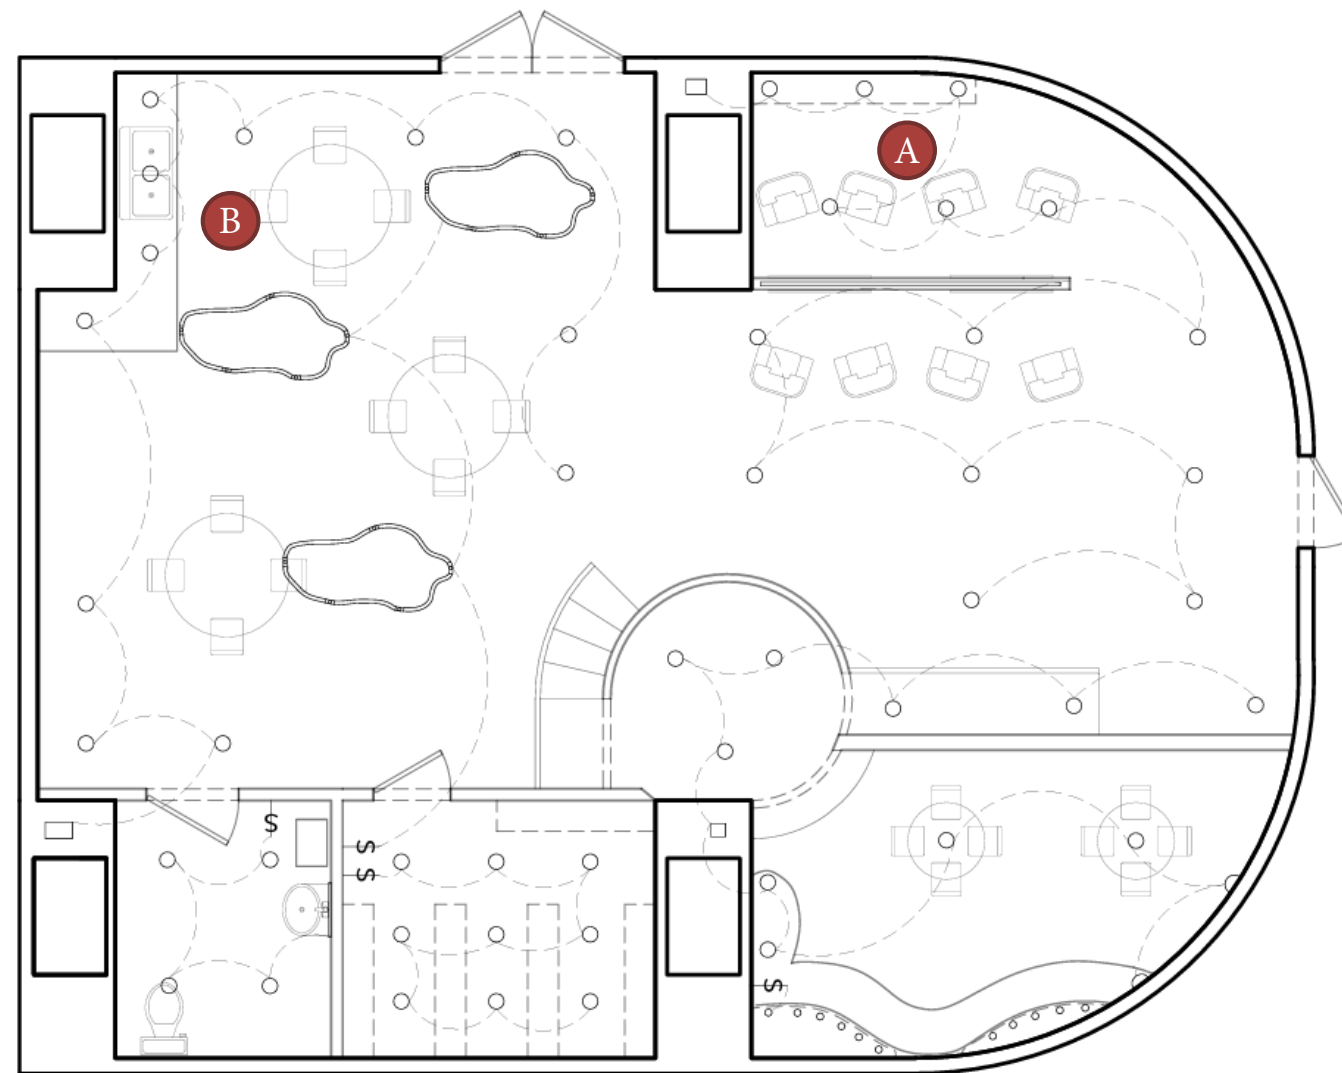

GAMING CENTER

SNACK BAR

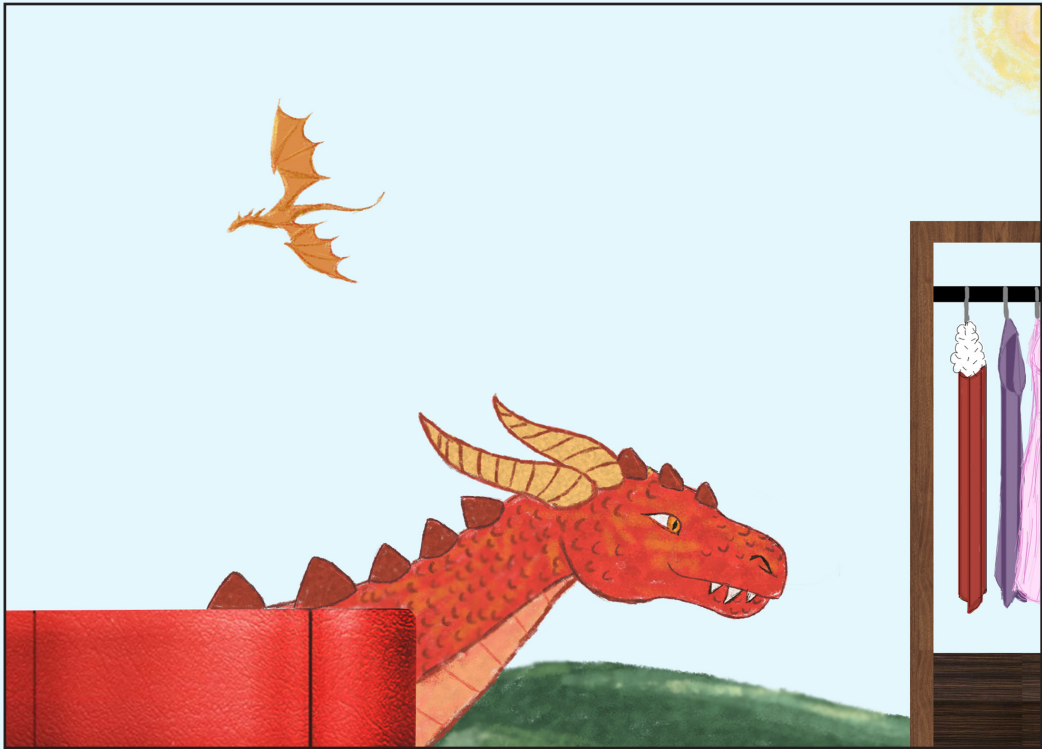

Featuring a light that resembles the sky, the *Cloud LED* can be installed flush with the ceiling or be suspended for varying heights. An interactive gaming center has the 8-bit dragon's fire illuminated in intervals. A snack bar where children and families can take a break and refuel. Imagination continues to expand through this immersive experience.

BEFORE PLAN

NEW PLAN

BATHROOM RENDER

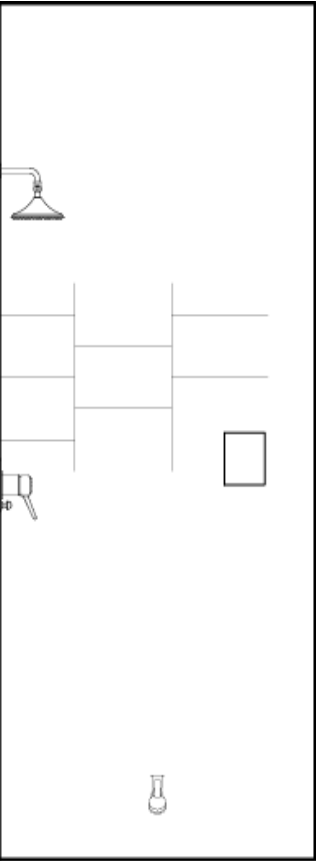

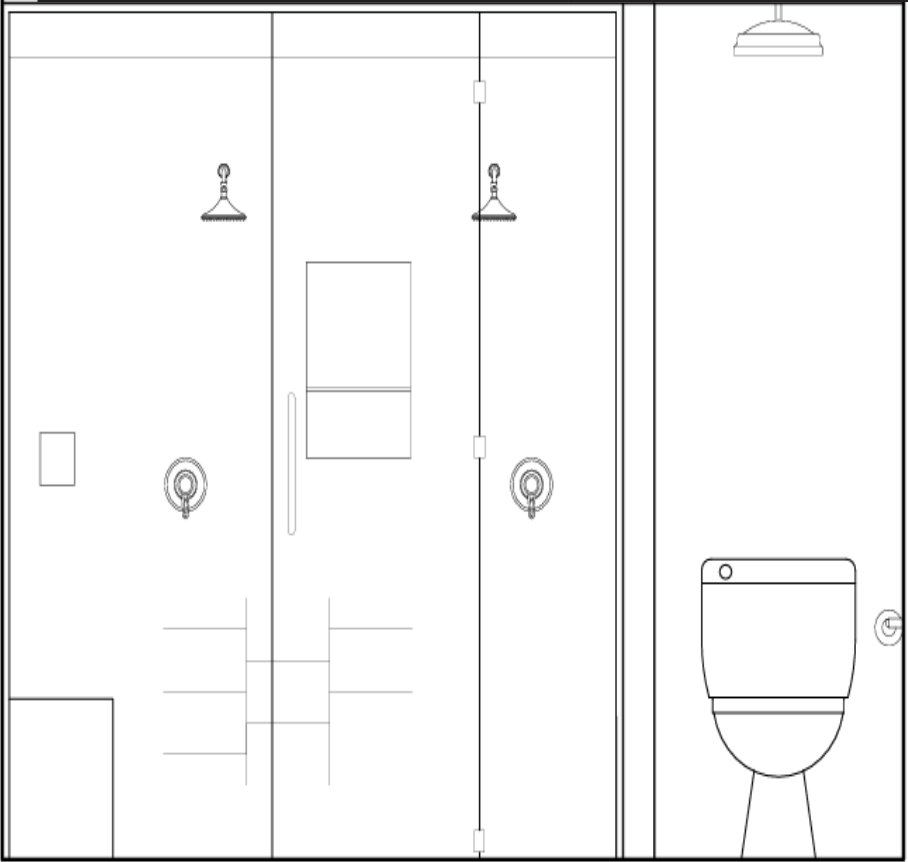

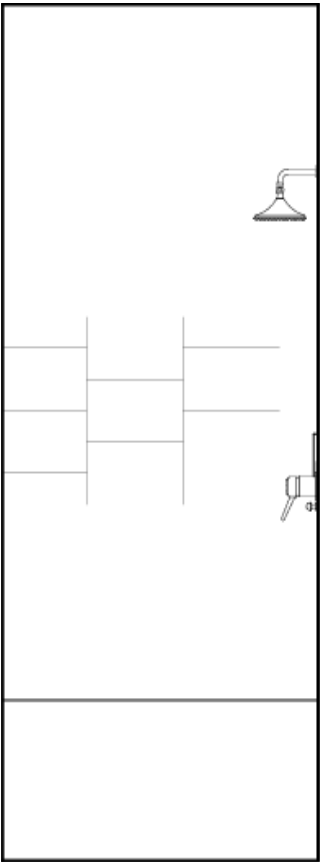

Clean lines and function were prioritized in this bathroom design. Calm, earthy tones promote relaxation. More privacy and luxury are offered through high-end products and equipment. Storage is maximized through the many drawers featured with the double vanity. This bathroom is made for the use of more than one person at a time.

# GOLDING RESIDENCE

*kitchen remodel*

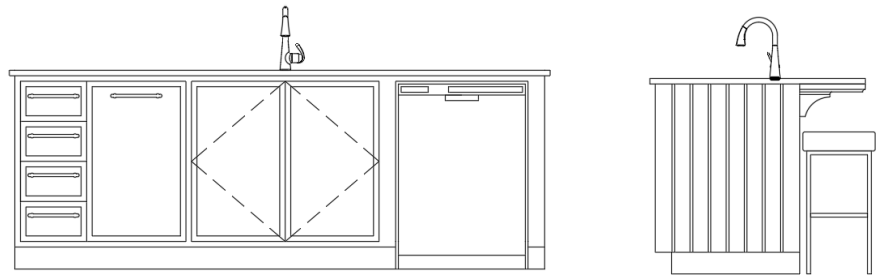

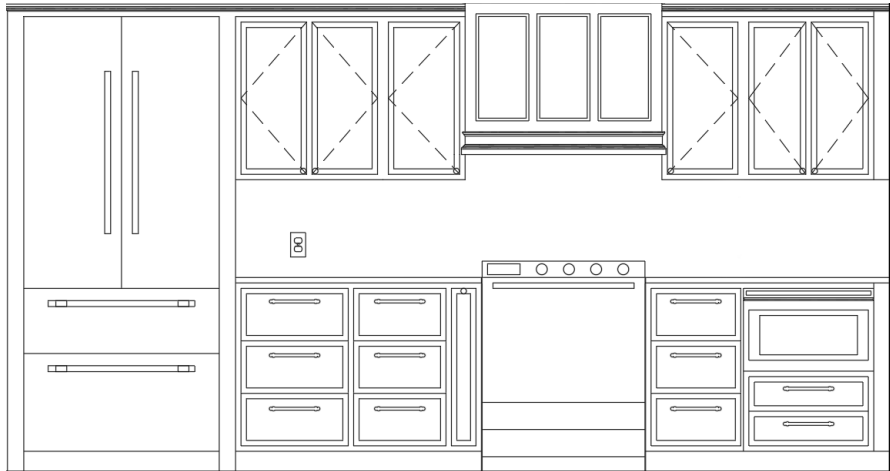

A kitchen works best when movement isn't stopped. Occupants of a home are always coming and going, using the space, or simply existing in the company of others. A kitchen is one of the first places in a home that can make someone feel loved and welcome.

*"Everything happens in the kitchen. Life happens in the kitchen."* -Andrew Zimmern
