

JESSICA COWGILL INTERIOR DESIGN PORTFOLIO

ABOUT THE DESIGNER

My name is Jessica Cowgill, and I'm a graduate of Ensign College's Interior Design program. My love for interior design dates back to high school when I took a class and fell in love with the discipline. I can use a myriad of tools to bring my designs to life, such as Auto-CAD, SketchUp, Revit, and Photoshop. I have great attention to detail, which is valuable for architects, contractors, and clients; These skills help me create phenomenal designs. I approach every project with excitement, creative ideas, and passion. I love working with each client's unique style and tailoring a space that fits their style goals and design needs. I am excited to get out into the field and design impactful spaces.

UNIVERSIAL HOUSE

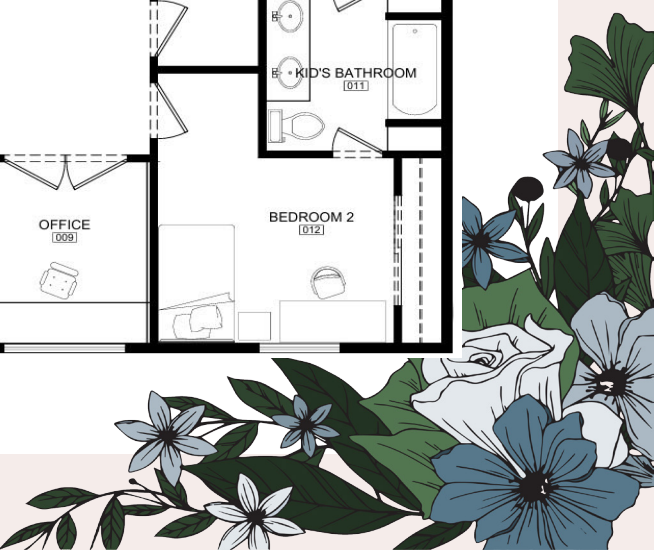

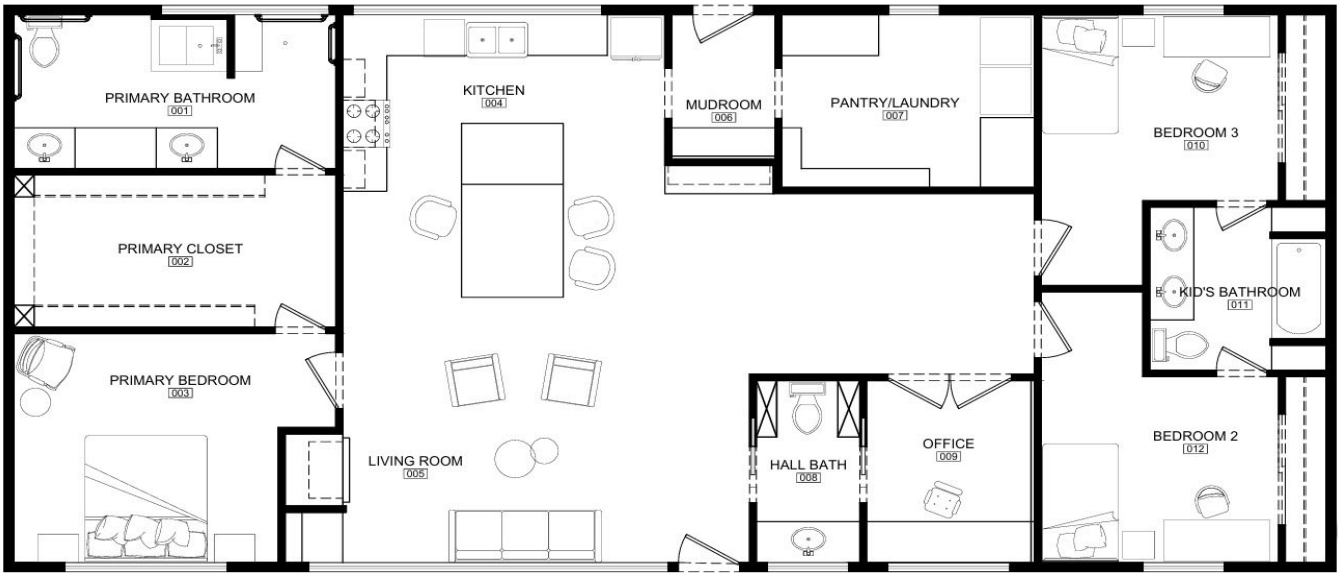

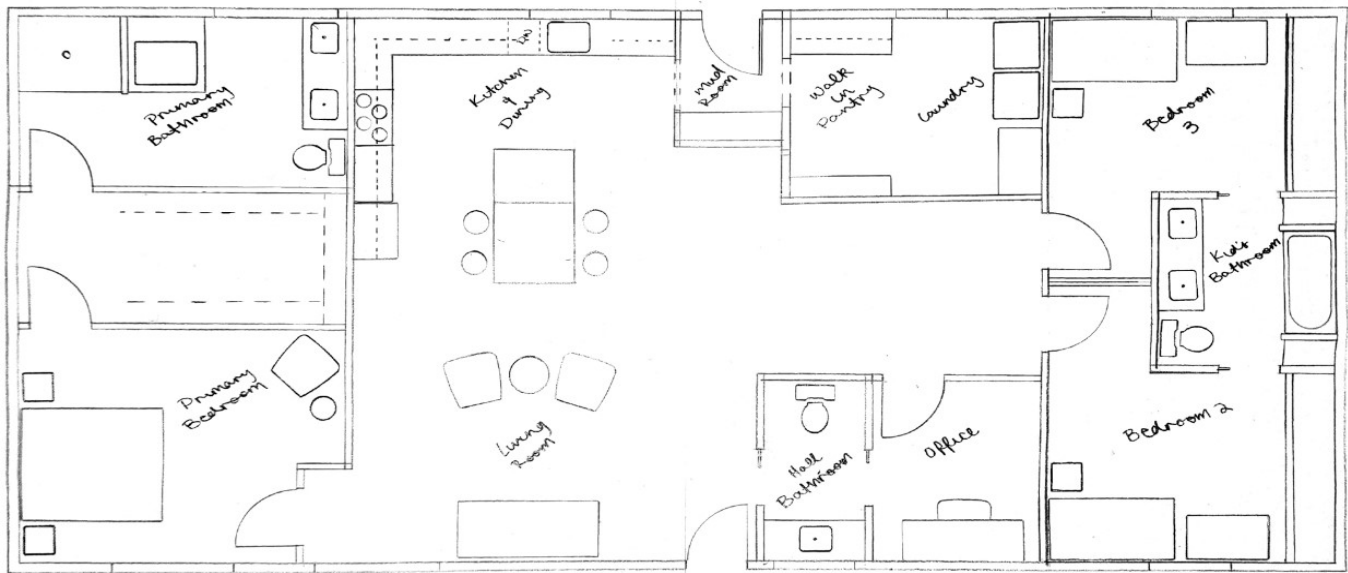

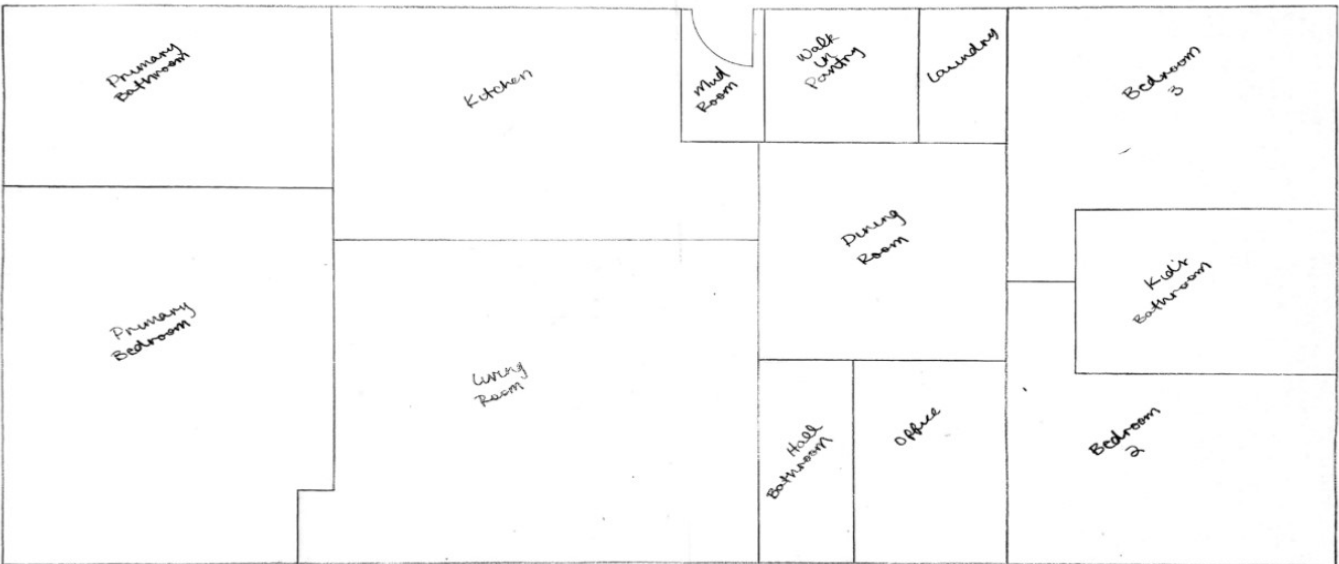

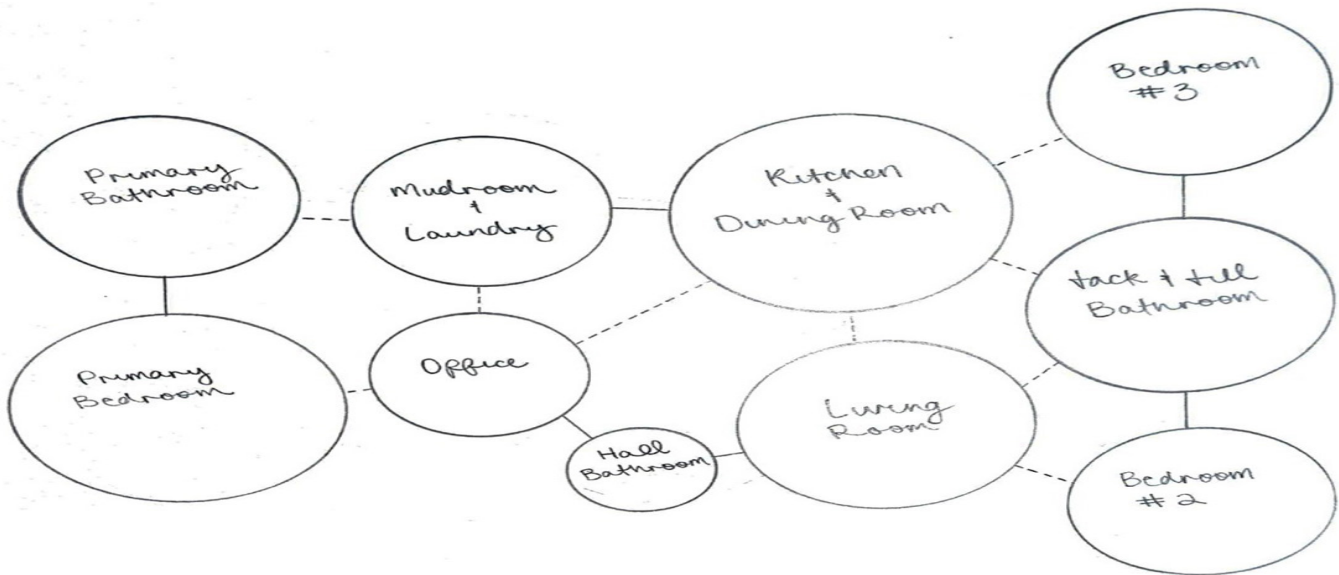

The intent of the Universal House was to design a home that is ADA-compliant and functional for everyone, whether they were in need of ADA-compliance or not. This meant we needed to take wheelchair accessibility into account throughout the design process.

My renovation included adding adequate turn-around spaces throughout each room in the home, lowered counter heights, ADA-required 1/2 inch pile carpet, and ADA-compliant flooring transitions. All of this brought a sense of unification to the home that it was lacking prior to the remodel.

HOME KITCHEN NEW BUILD

The intent of the home kitchen build was to learn proper documentation under NKBA guidelines. This meant we needed to learn how to write out full specifications, create good/functional designs, and properly dimension the space.

I created a functional design by creating multiple layouts and choosing the design that provided the client with the most functional space for their needs and wants.

CLARKE HOME REMODEL

The intent of this project was to remodel the dark, outdated Clarke residence into a mid-century/contemporary oasis for their family of 4 who host frequent visitors. The design intent was to brighten up the space while creating a comfortable environment where the family could gather/host in an open-concept floorplan.

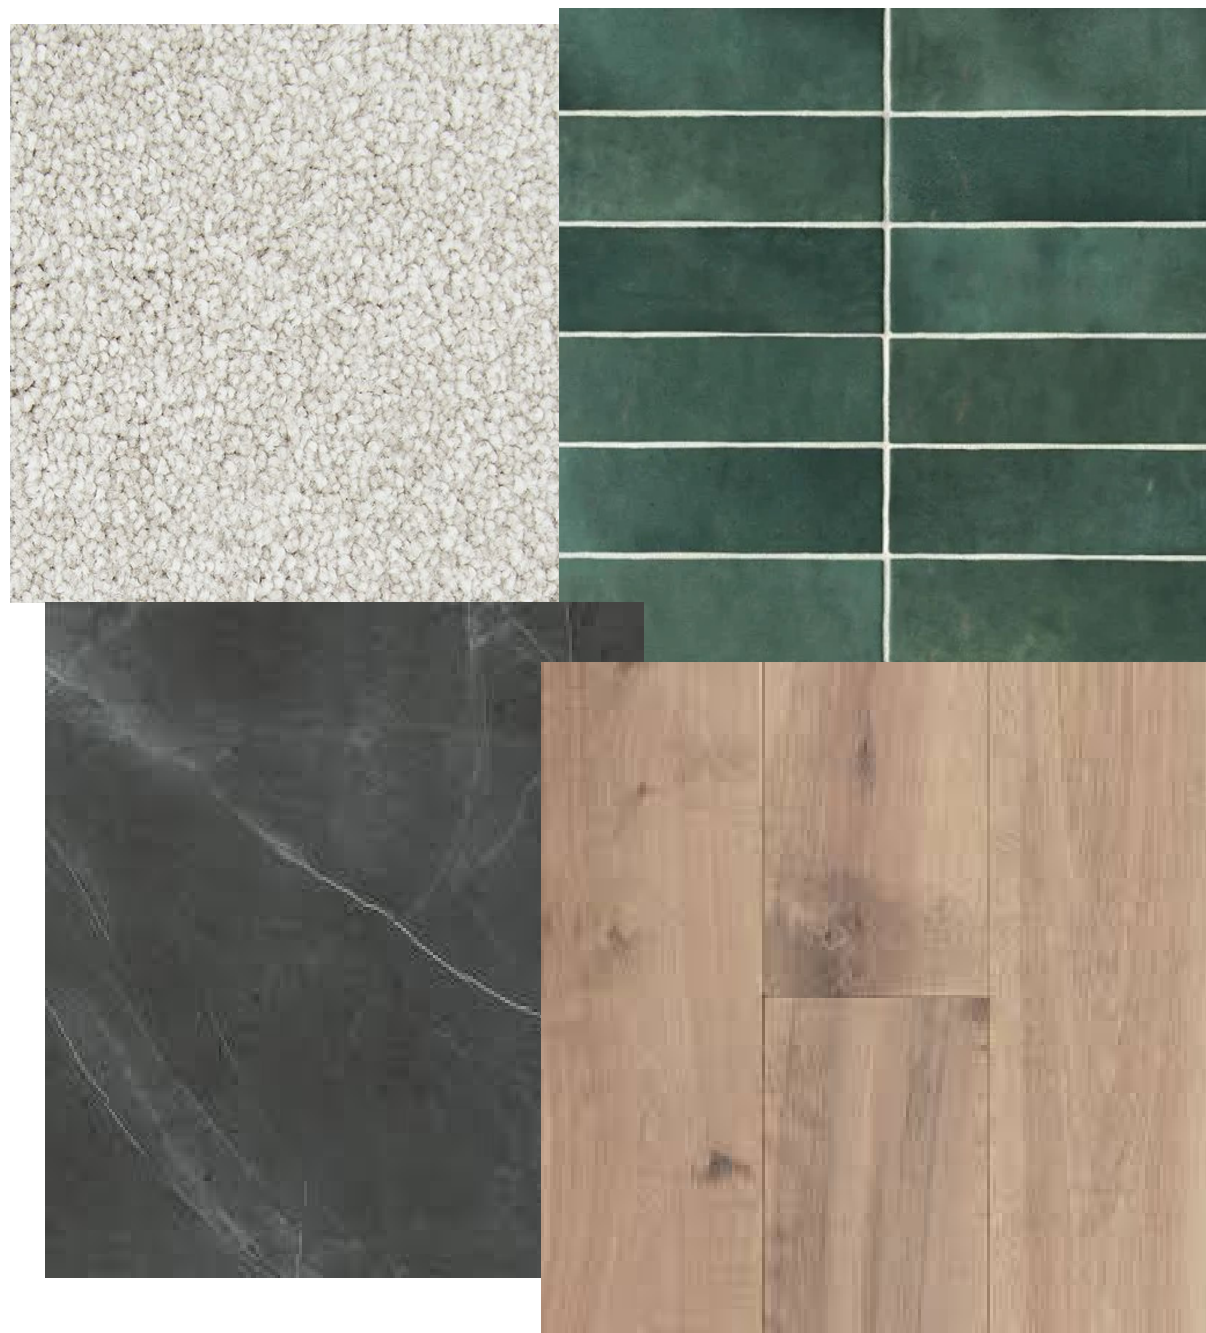

My renovations included increasing the amount of natural light that flows throughout the residence, decreasing the number of walls that separate the spaces, and increasing the amount of space where family gatherings occur while keeping the client's needs and wants in mind.

JOSEPH SMITH MEMORIAL BUILDING REMODEL

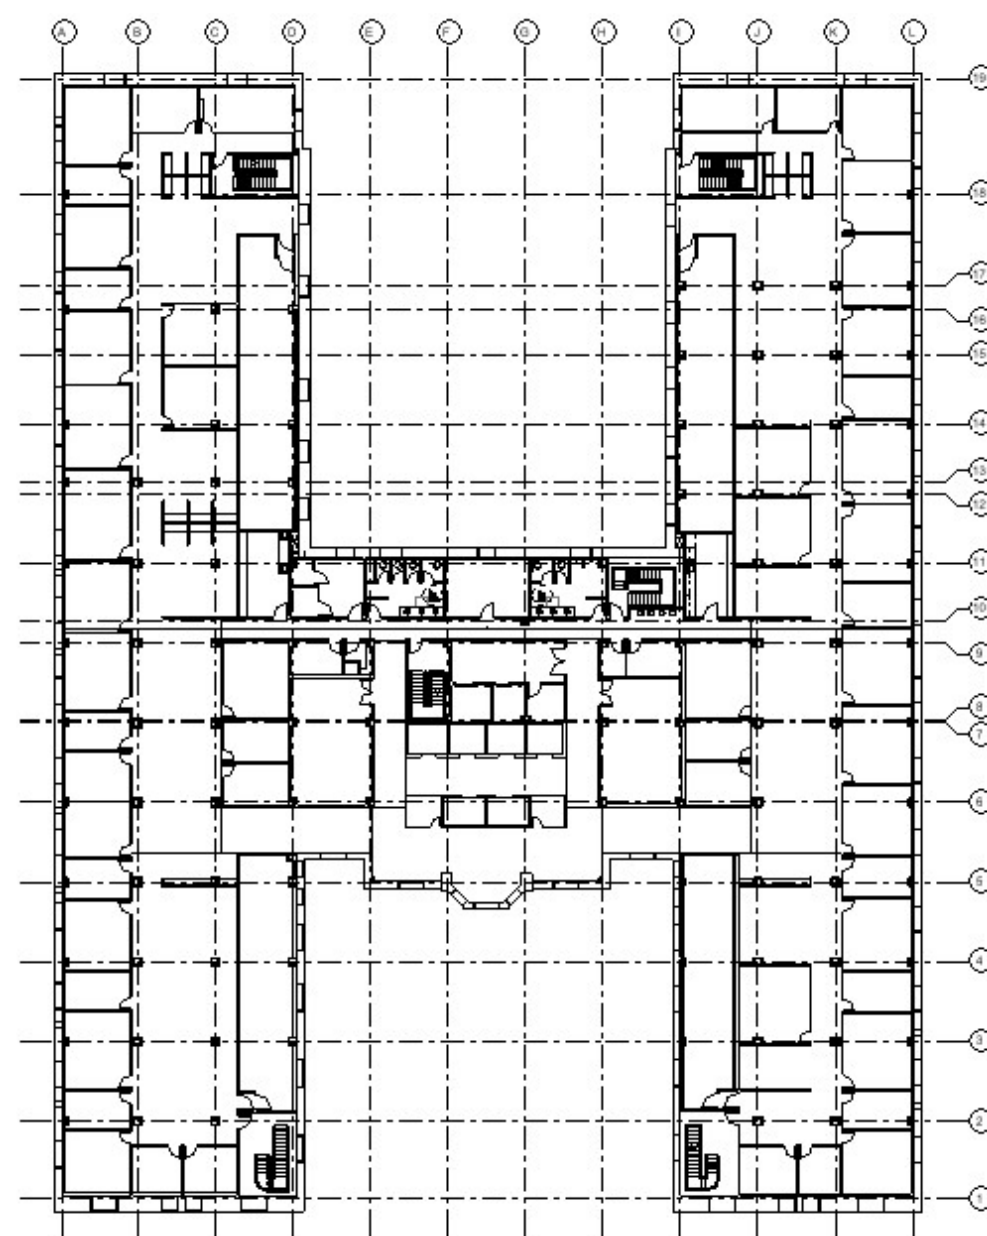

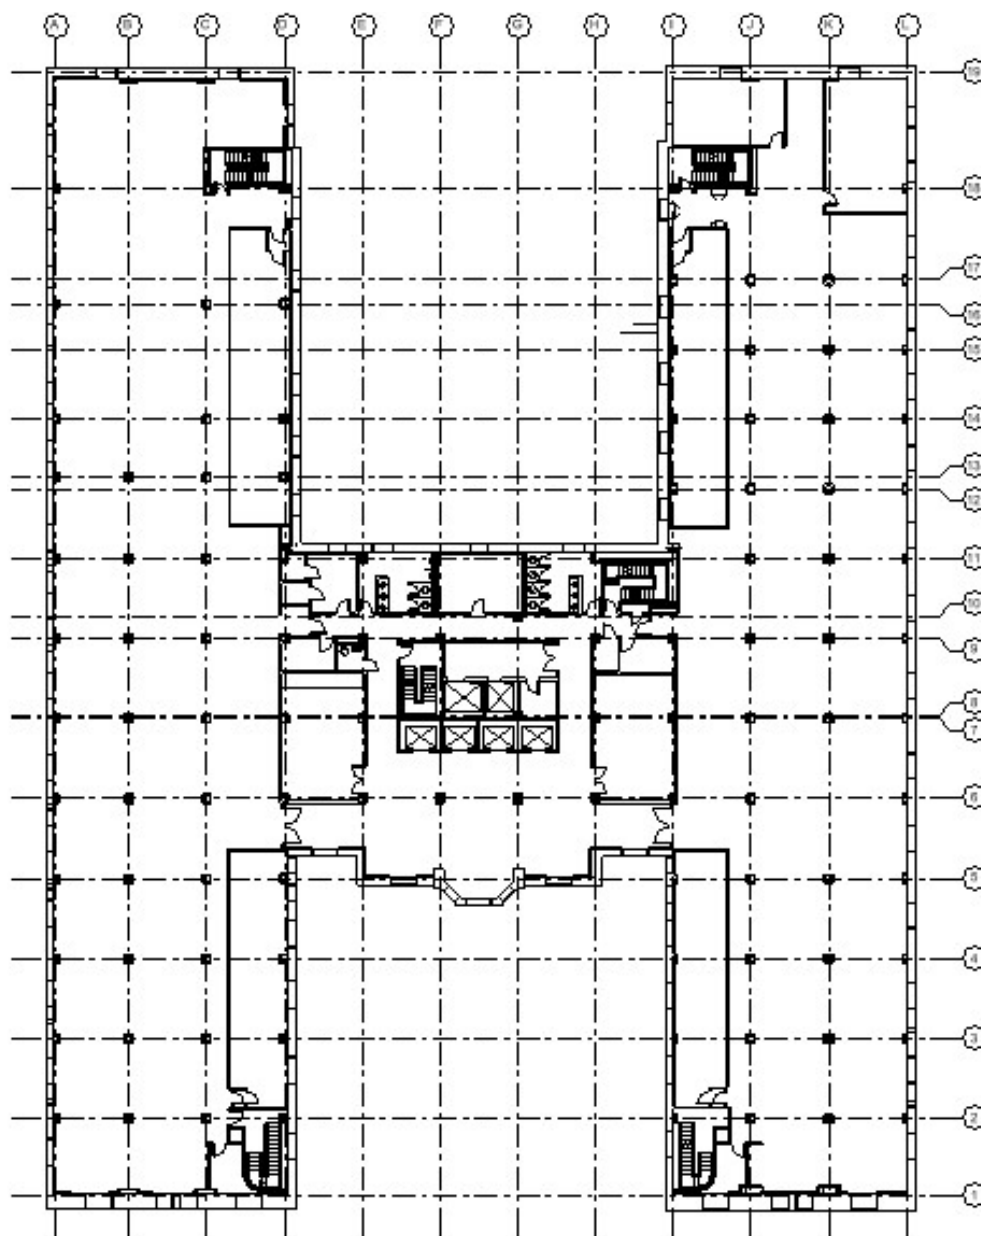

The intent of this project was to dive into commercial office design with hybrid and executive spaces. The design intent was to make the space functional, elegant, and ADA-compliant while keeping with the history and spirit that engulfs the Joseph Smith Memorial Building.

My renovations included deliberately choosing furniture, lighting, and finishes that embody the elegant, classy, and traditional design style. by bringing the outdoors in, there was a sense of life and brightness added to the space that was lacking before the renovation.
