BOUNTIFUL HOUSE REMODEL | JOE JONAS RESIDENCE

This residential redesign reimagines a classic home as a refined retreat inspired by the iconic design principles of the 1970s. Created for musician Joe Jonas, the project draws from Mid-Century Modern influences, blending vintage character with contemporary sophistication.

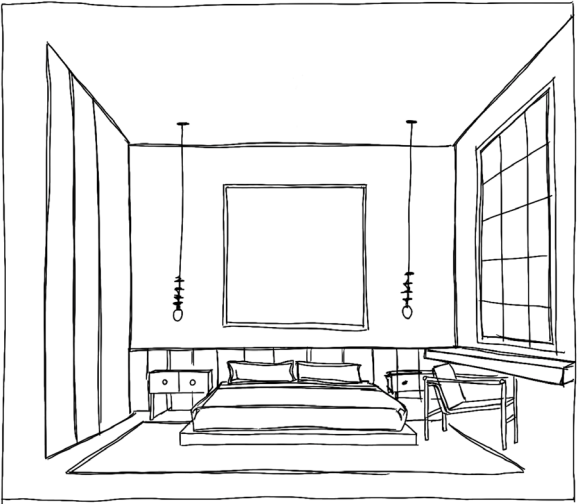

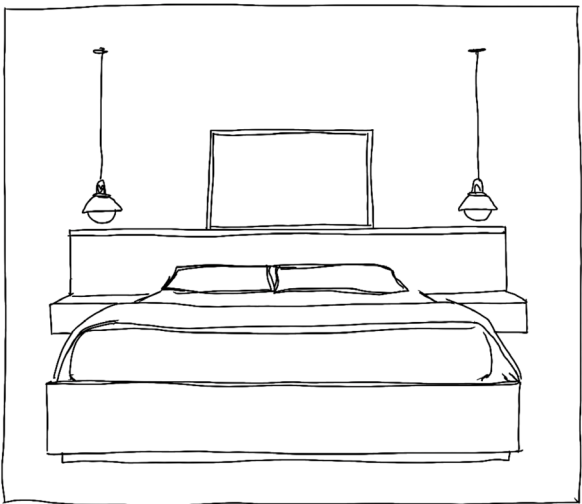

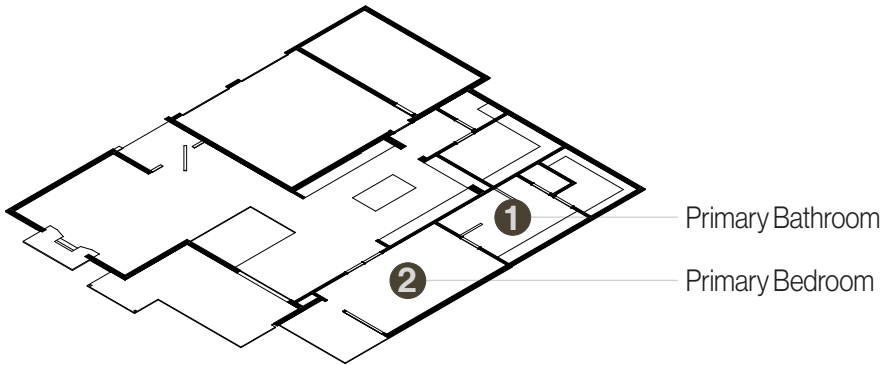

Clean lines, rich walnut finishes, and timeless furniture silhouettes establish a warm and inviting atmosphere, while thoughtful material selections elevate the home with a polished, high-end aesthetic. The result is a space that feels both nostalgic and distinctly modern.

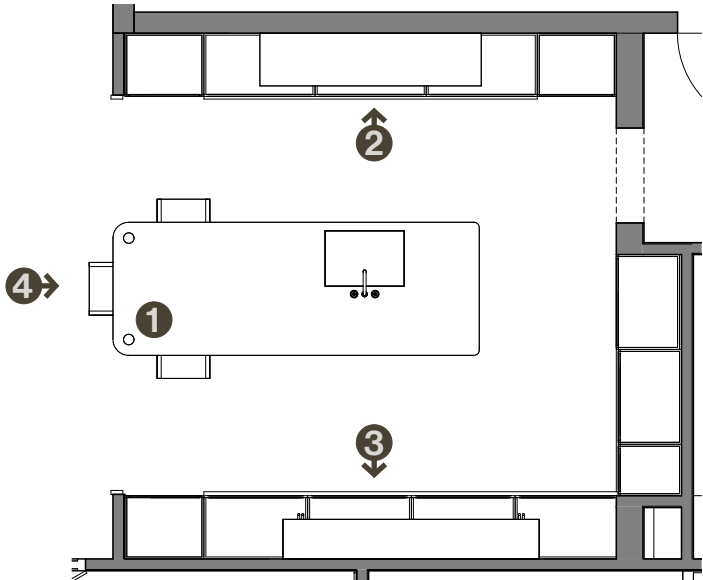

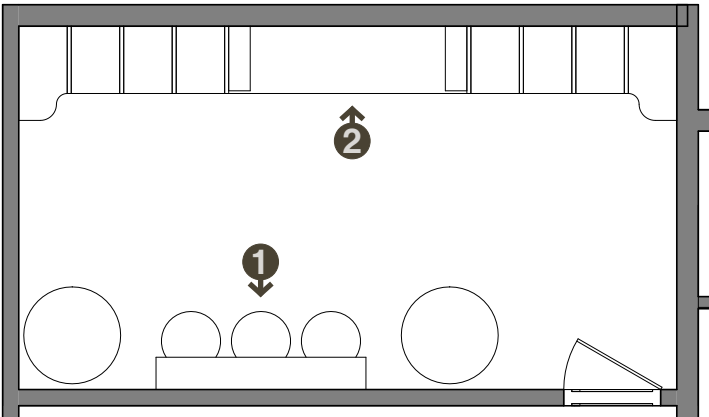

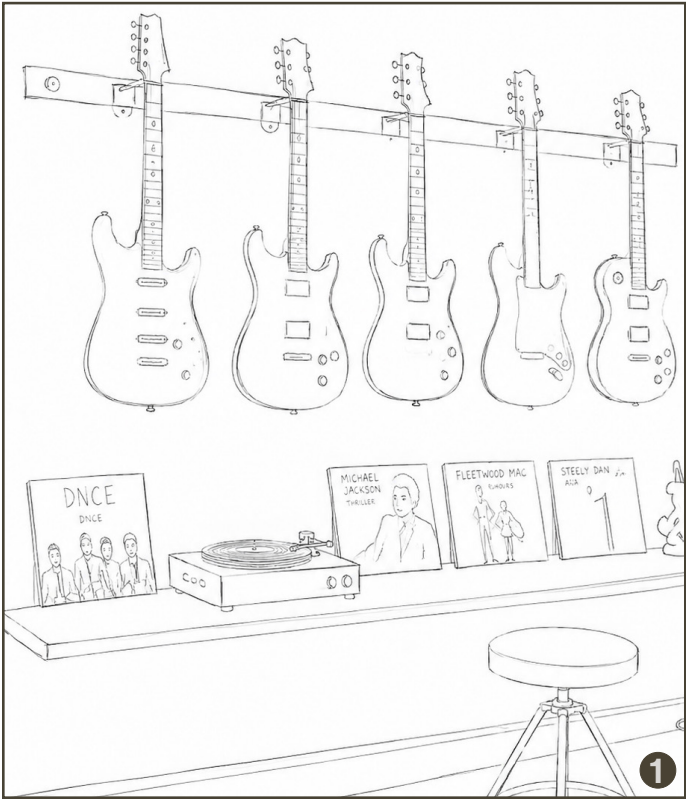

The primary bedroom was designed as a warm and relaxing retreat. Concept sketches guided the layout and design decisions, resulting in a space that blends vintage character with modern sophistication.

This custom island features a wood leg that visually passes through the countertop, creating a unique architectural detail. A double bullnose edge adds softness and highlights the craftsmanship of the piece.

Inspired by classic listening rooms, this custom built-in combines storage, display, and audio equipment into a single statement piece.

Reflecting Joe Jonas's commitment to an active lifestyle, this gym was designed to support both physical wellness and mental clarity.

KITCHEN REMODEL | GOLDING RESIDENCE

For this busy mother of two, the kitchen was more than a place to cook, it was the heart of the home. The design focused on creating a space that could support everything from rushed school mornings to family dinners and weekend baking sessions.

Through custom millwork, personalized storage solutions, and carefully selected finishes, the remodel transformed an outdated kitchen into a timeless space designed around the family's everyday life.

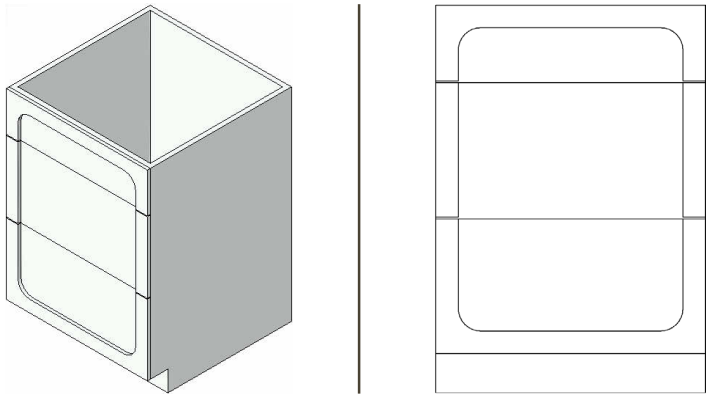

Thoughtfully integrated millwork elevates the dining room beyond a simple eating space. The paneled walls introduce rhythm and texture, creating a cohesive connection between architecture and interior design.

BOUTIQUE HOTEL | SOL

Created for Solstice & Stone, this boutique hotel offers a refined retreat rooted in the principles of Japandi design. The project combines clean lines, natural materials, and a restrained palette to create an atmosphere of understated luxury and calm.

By emphasizing simplicity, craftsmanship, and connection to nature, the design transforms the hotel into a restorative sanctuary where guests can unwind, recharge, and find moments of quiet throughout their stay.

The beginning of stillness

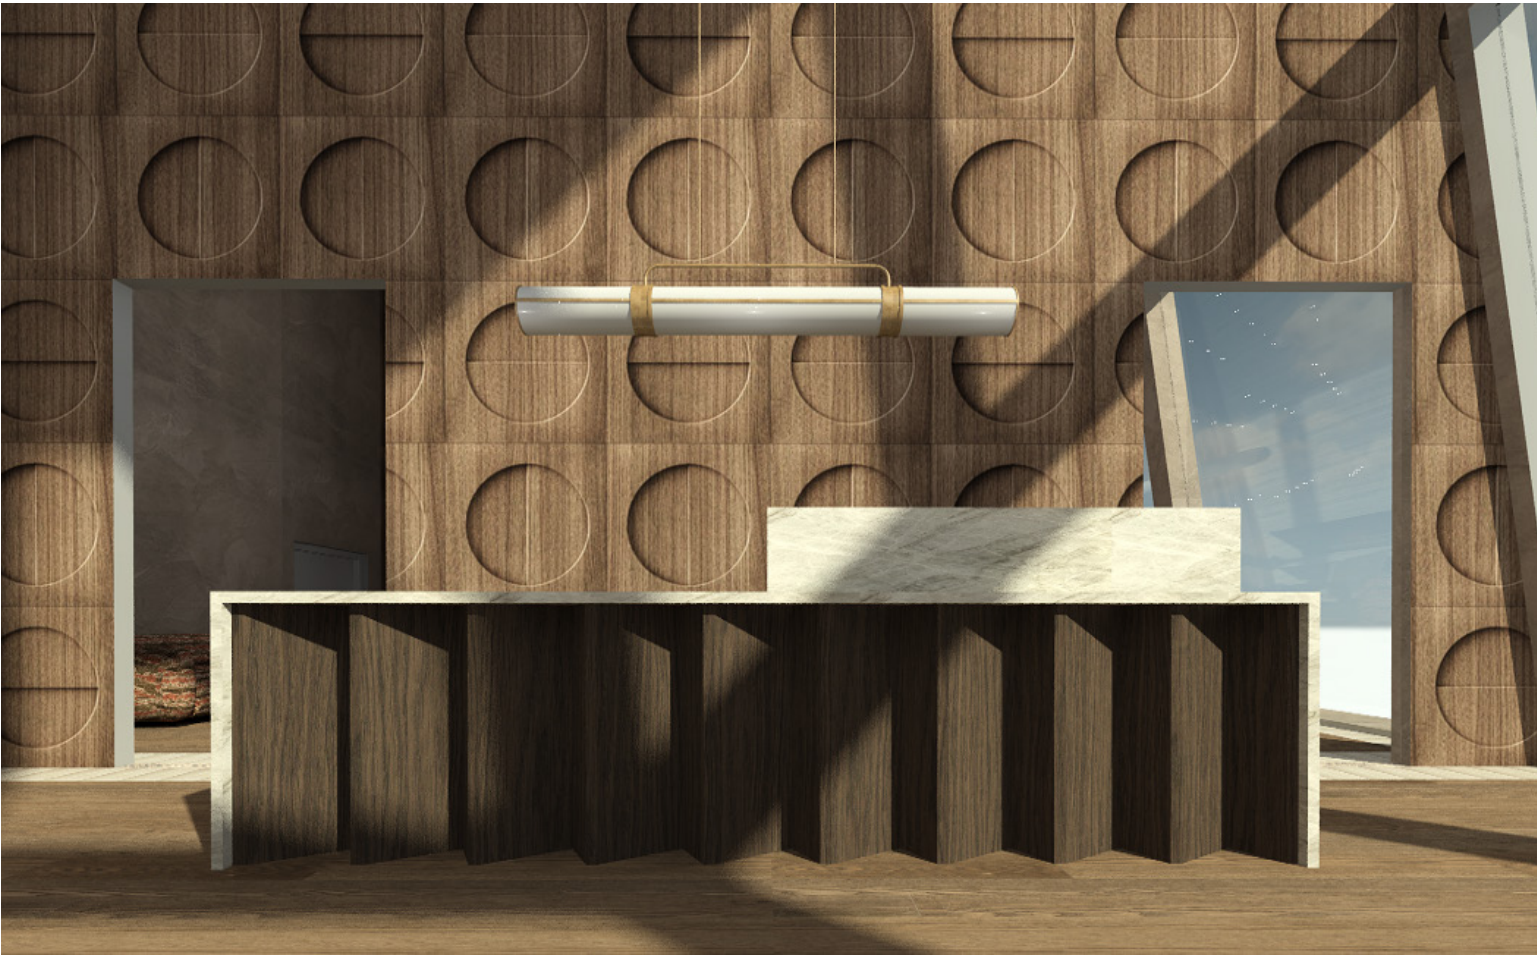

La Fondation Hotel | Paris, France

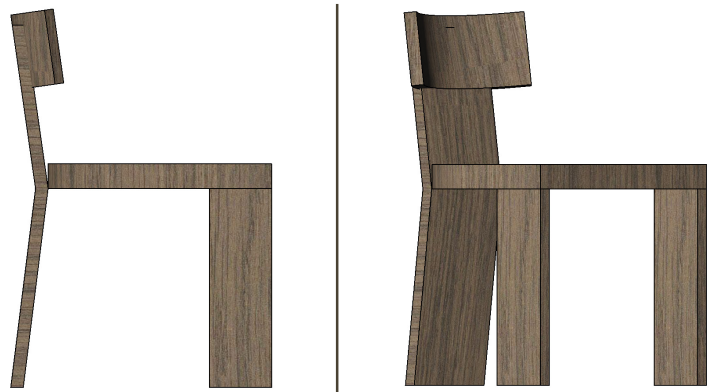

Rather than relying on ornament, the design creates visual interest through depth, shadow, and proportion. As natural light moves through the lobby, the millwork reveals a constantly changing pattern of highlights and texture.

BOUTIQUE HOTEL

SOL BY SOLSTICE & STONE

Inspired by traditional woodworking techniques, the chair celebrates honest construction and clean lines. The result is a piece that feels both contemporary and timeless.

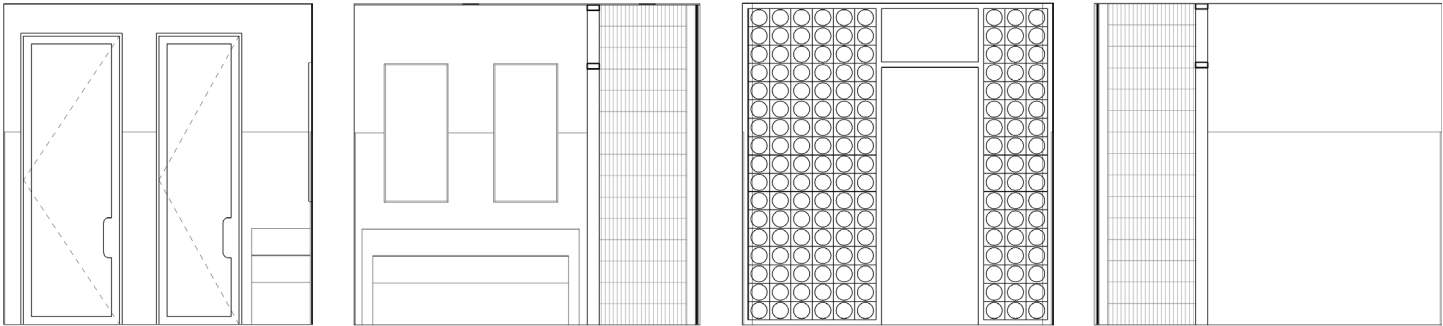

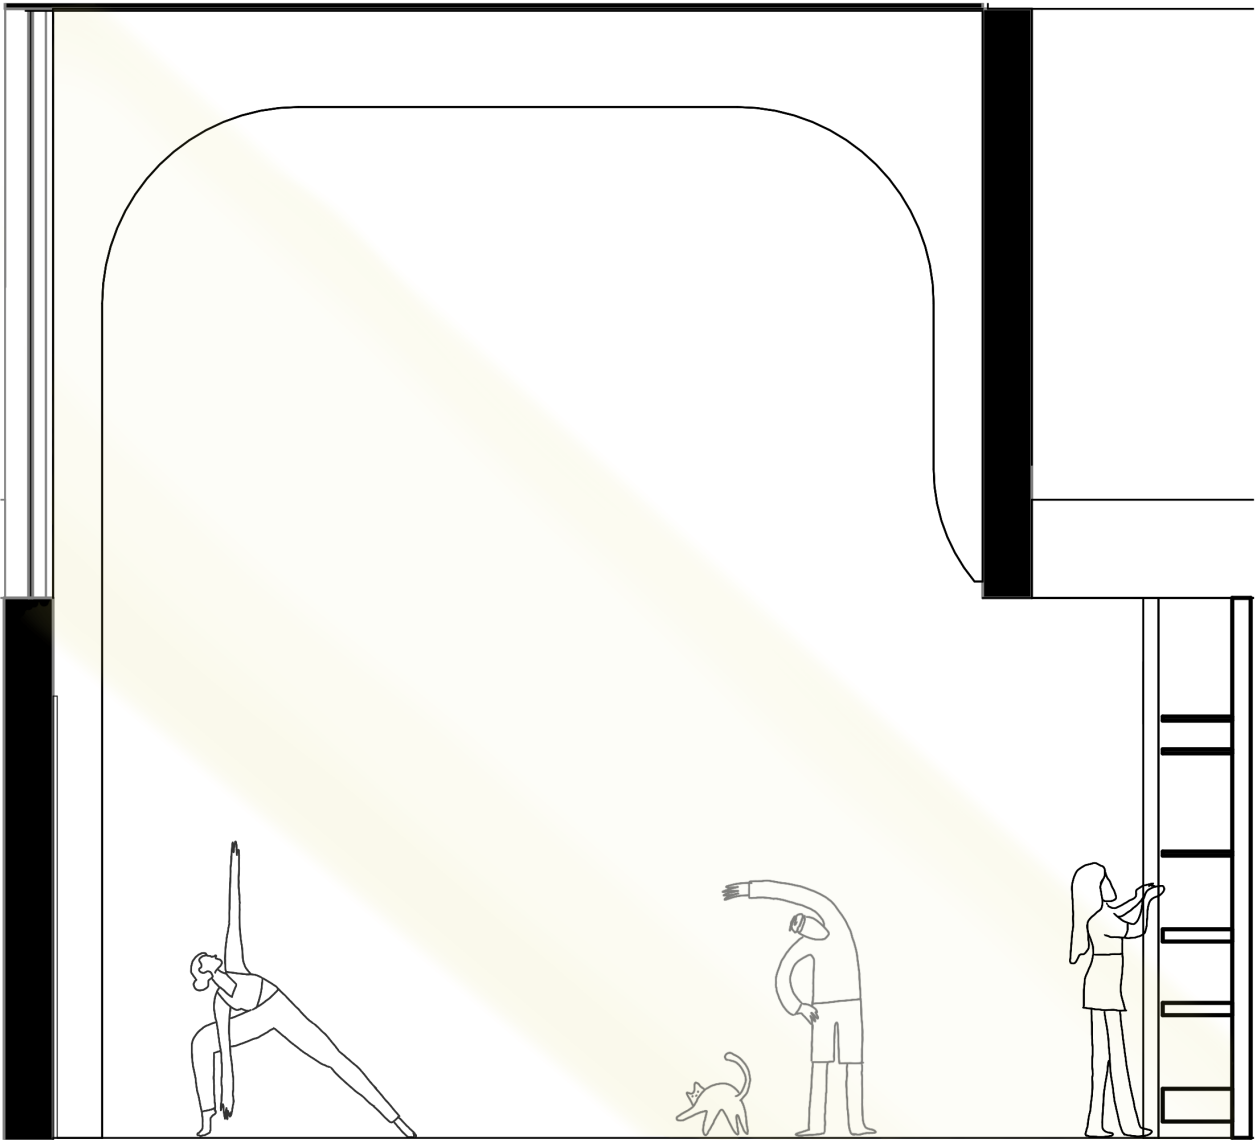

Integrated directly into the architecture, the custom banquette creates intimate seating zones throughout the restaurant.

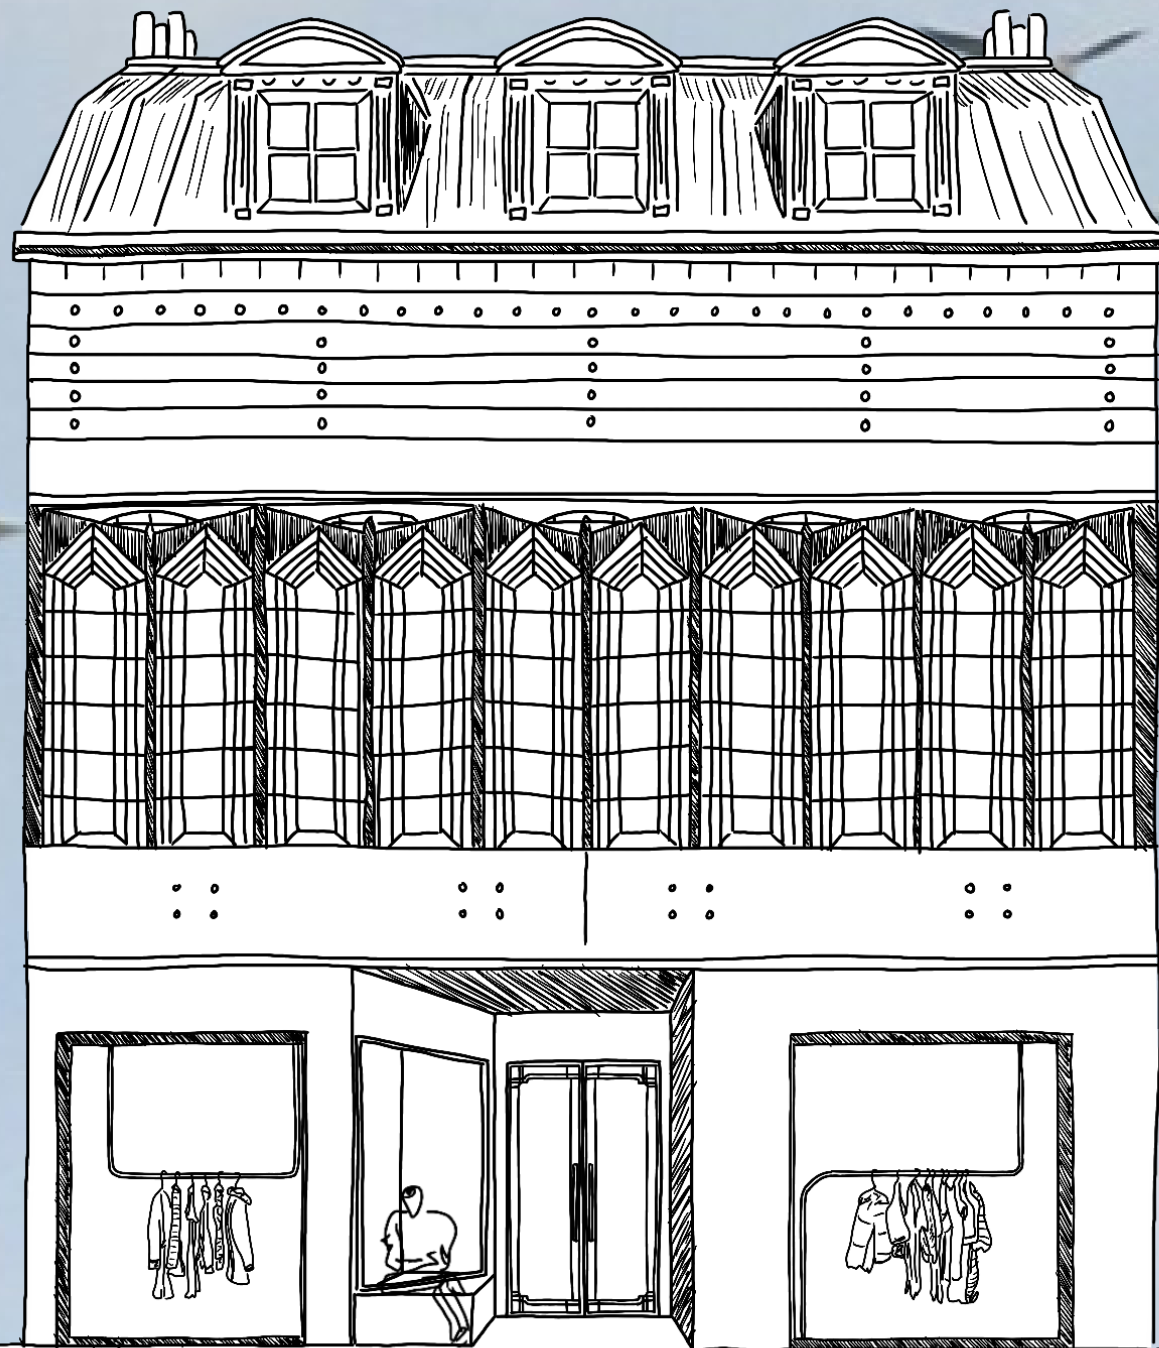

The guest suites are designed as quiet retreats, combining warm wood tones, natural stone, and soft textures to create a sense of calm. Floor-to-ceiling windows fill the rooms with natural light, while thoughtfully curated materials bring warmth and simplicity to the space. Every detail is intended to foster rest, relaxation, and a deeper connection to the surrounding environment.

A series of oversized arches creates rhythm and movement throughout the yoga studio, transforming a simple wellness space into an immersive architectural experience. The layered forms frame views, define zones, and encourage a mindful transition from the outside world to a place of reflection.

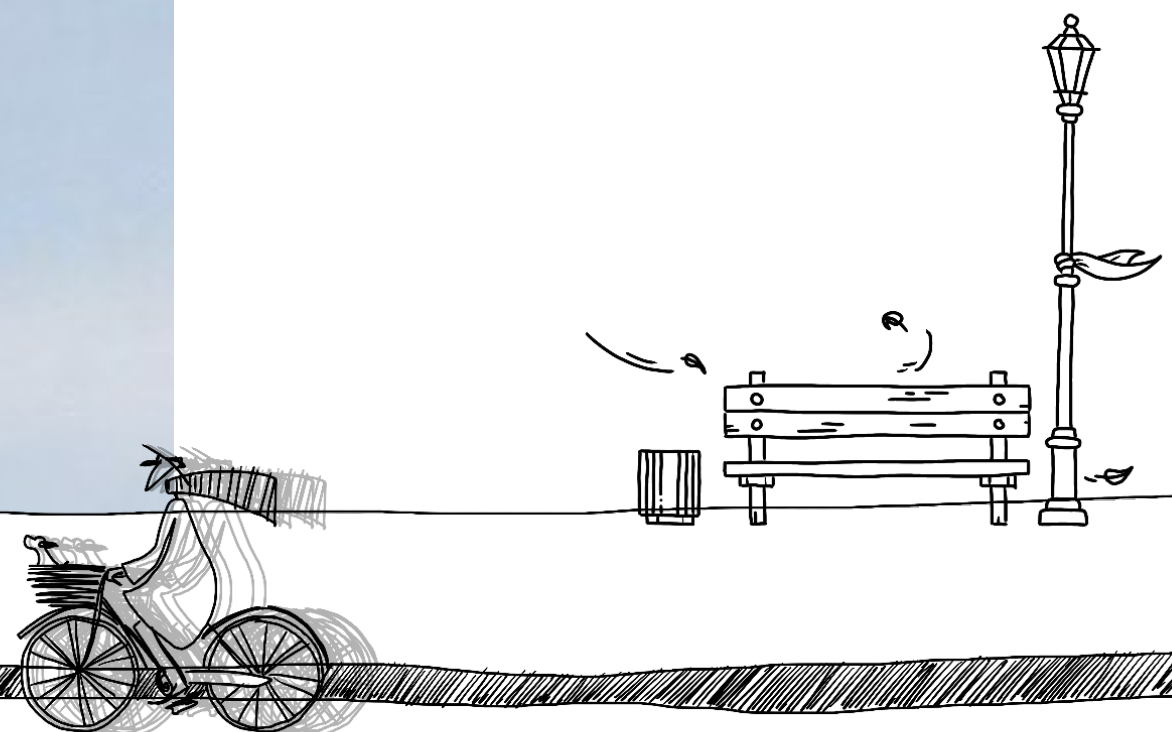

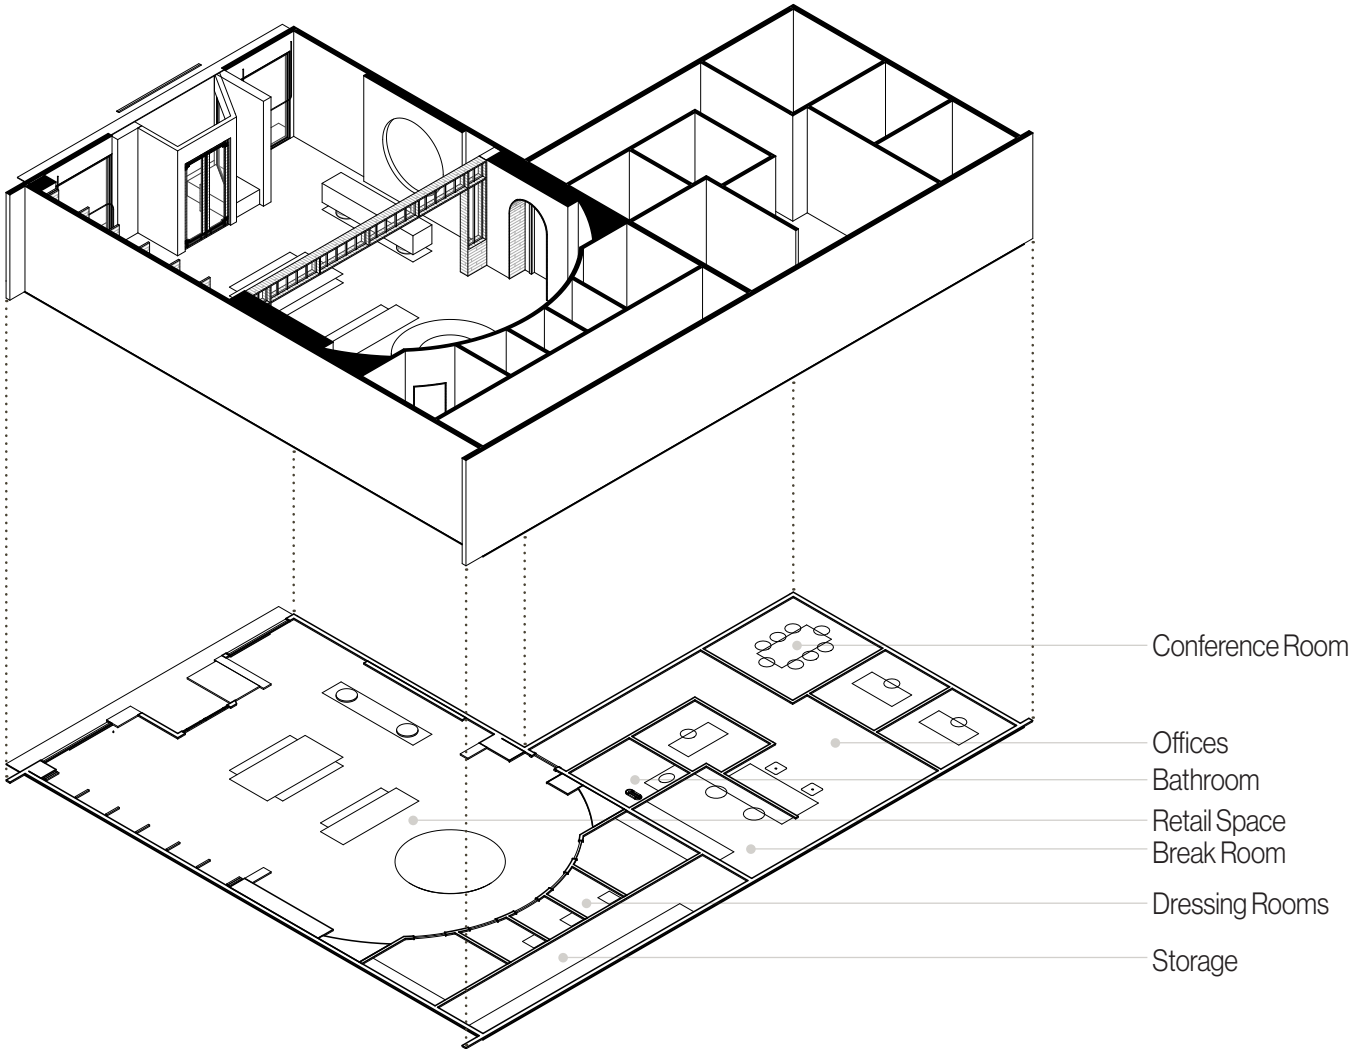

04

RETAIL SPACE | KOHANA

Kohana, meaning “little flower” in Japanese, served as the inspiration for this boutique fashion and beauty concept. Anchored by a sculptural cherry blossom tree, the design draws upon the fleeting beauty of nature to create a retail experience that feels elegant, immersive, and memorable.

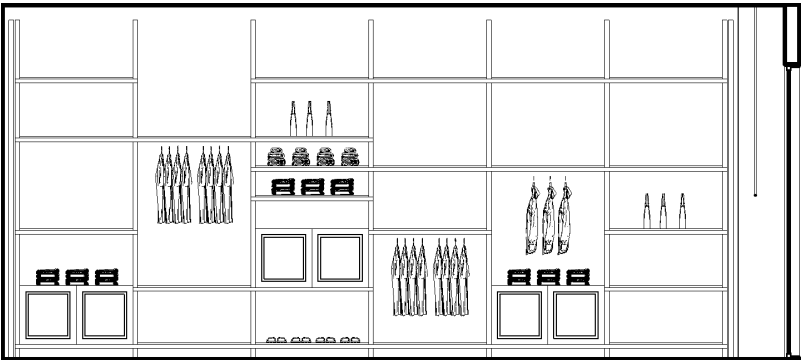

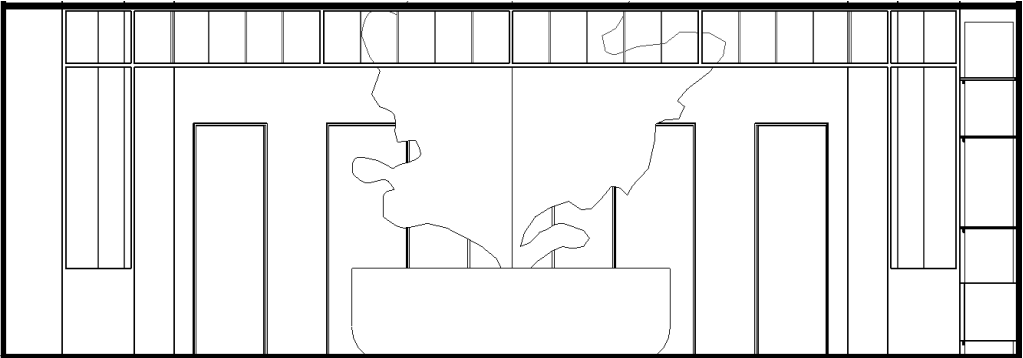

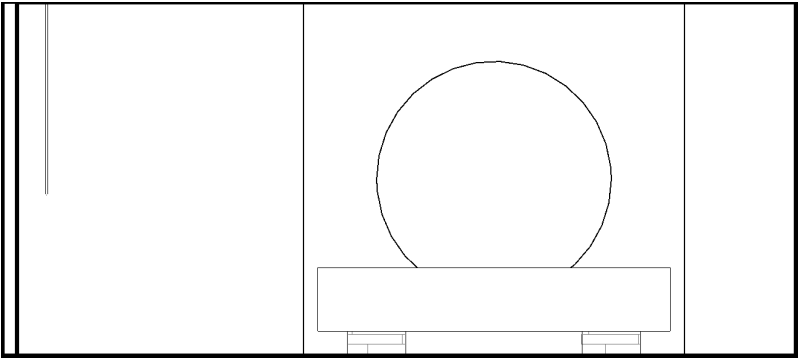

Through a balance of organic forms, refined materials, and curated product displays, the space transforms shopping into an experience of discovery, encouraging customers to engage with the brand in a meaningful way.

RETAIL SPACE

The use of stainless steel in the display elements further enhances this cool, optical language, while the wooden details introduce warmth and gravitas.
